**Dear reader,**

"Economic Development", published by the Institute of Economics – Skopje, is an academic journal in the field of economic development and has been an important medium for 16 years. The main goal of "Economic Development" is to provide intellectual platform to the wider academic and professional publics, and promote the development of economic thought in the country and the world. The interest and need for publishing of the journal were continuously increased all these years

On the path of development of the economic thought and building a wide network of research and professional cooperation with other countries in the world, we set new goals, criteria and challenges in order to improve the journal's quality. In this regard, during 2010 and 2011, significant changes have been made in editorial policy, design and its availability to broader academic and professional public in the region and worldwide. As result of all this changes, starting from no. 3/2010 "Economic Development" will shift into international journal, will be published in English language and will be distributed in all countries of the region and worldwide.

This academic journal covers theoretical and empirical researches in the field of economic and social development, demography, education, corporate governance, international economics, international management, administrative management, corporate and public finance, economics and tourism management, agricultural policy and agricultural management, marketing and marketing management, entrepreneurial management and other areas in the field of social sciences.

The journal "Economic development" has an open approach in accepting and publishing the papers reviewed by an international editorial board consisting of three domestic and five foreign experts. The journal is available in print and online form, through the database of academic papers published by the Institute.
