On behalf of the Macedonian Association for Maxillofacial Surgery (MAMFS), BAMFS and with support of EACMFS, we warmly welcome you to the Third Balkan and International Congress for Maxillofacial surgery, joined with our Second National Congress

of MAMFS. The Congress is to be held in Ohrid, Macedonia on April 24-27, 2014.

The theme of the congress is "Strengthening connections for surgeons". Balkan has a long history of building bridges between East and West, North and South, developed and developing countries, rich and poor, and it is particularly important to maintain and expand the international network of surgeons from all over the region.

The scientific program follows conventional lines with sound representation of current concepts and techniques in our surgical field (trauma management, inflammatory diseases, surgical pathology of salivary glands, implant surgery, surgery of facial deformities and clefts, oral tumors and reconstructions), as well as sessions in postoperative treatment, endoscopy and interdisciplinary approaches with cross-specialty sessions in areas of joint interests. The social program includes the opening ceremony, Ohrid night with boat tour and Gala dinner.

End of April in Ohrid is one of the finest times of the year, fairly warm and commonly sunny, beautiful evenings and lively cultural activities going on into the pleasant nights. The best choice of the hotels on the Ohrid Riviera with optimal prize categories is offered.

Get ready for an experience of a lifetime, come to Ohrid, come to Macedonia, WELCOME !

Congress President
Prof. Dr. Vladimir Popovski
