Research Progress on the Effect and Mechanism of Traditional Chinese Medicine
Treatment for Scar

Zhu Jihe (Weihui Traditional Chinese Medicine Hospital, Henan Province 453100)

Abstract: Objective: to discuss the research progress on the effect and mechanism of the TCM treatment for scar. Methods: to conclude the process of the progress on TCM treatment for scar, through research on effect and mechanism of the ingredients of several Chinese medical herbs in treating scar. Results: Several Chinese medical herbs are found effective in treating scar, such as saponins, flavonoid, polyphenols, alkaloids and terpene. Conclusion: With the long history of TCM treating scar, it attracts more and more attention to treat scar with the TCM therapies, and simultaneously related experiments and mechanism research get progressive.

Keywords: Ingredients of Chinese Medical Herbs; Scar; Effect and Mechanism;
