BaSS President Message

Dear distinguished colleagues and friends

Clinicians, researchers, academics, and all dental healthcare professionals are warmly invited to the 22nd Congress of the Balkan Stomatological Society (BaSS), which will be held in Thessaloniki, the beautiful historical city, Greece, from 4th to 6th May 2017.

The scientific program of the Congress will comprise plenary lectures, oral presentations and posters of leading Balkan, European and World lecturers and scientists! They will all present the latest achievements in the field of dental medicine, the most modern practice in contemporary preservation of oral health, and enhancement of dental treatment.

Thessaloniki is a charming city with incredible history and beautiful scenery, which you are sure to enjoy. Beside the many interesting events and scientific meetings, I hope you will find time to meet up with old friends and make new acquaintances.

The 22nd BaSS Congress will also be an opportunity for our industry partners to showcase their latest advances in all fields of dentistry, and I believe that related industries will continue to support our Societies' activities for the future wellbeing of our profession.

I wish you a memorable stay in the host city of Thessaloniki, and look forward to welcoming you at the 22nd BaSS Congress.

Professor Dragoslav Stamenkoviz, DDM, MSc, PhD

President of the BaSS

Congress President Message

Dear distinguished colleagues
dear friends,

as President of the 22nd BaSS Congress, I am greatly honored to welcome all of you to the 22nd Congress of the Balkan Stomatological Society that will be held in Thessaloniki, in the renovated Macedonia Palace Hotel, from 4th to 6th of May 2017.

It is not only a great honor but also a great responsibility to be the President of this so important scientific, professional and social event with its theme of "Contemporary Challenges in Dentistry" that will focus on the recent advances and cutting edge future of Dentistry. It is also a great pleasure to me, inviting you in Thessaloniki, one of the most famous cities in the Balkan region, with over 2500 years of history and extremely exiting scenery.

The 22nd congress aspires offering to the practitioners an ideal opportunity for contemporary medical education, learning about recent advances on new technologies and exchanging scientific ideas and experiences in our professional specialties.

The scientific and social program will express our wills of progress and renewal in dental practice as well as strengthening collaboration and friendship in good neighbouring relations. A sponsors' exhibition on new dental- technology, will give us ideas on new tools, equipment, materials and devices useful in our daily practice.

I wish you a pleasant stay in the host city of Thessaloniki and I am looking forward to welcoming you at the 22nd BaSS Congress.

Sincerely yours
Prof. Lampros Zouloumis DDS, MDS, PhD OMFS

President of Thessaloniki Dental Society message

Dear colleagues and friends,

On behalf of the Dental Society of Thessaloniki, it is my great honor to welcome you at 22nd Congress of the Balkan Stomatological Society which will be held at "Makedonia Palace" in Thessaloniki from 4 to 6 May 2017.

Dental Society of Thessaloniki was, is and will always be bonded to the BASS. All the members of the organizing committee had a great co-operation and I'm sure that this Congress will be a successful one.

The scientific program covers a wide range of subjects of interest and keeps the participants abreast of the last evolutions in dental practice. There will also be a trade exhibition, hands-on courses and workshops to choose from.

I invite you to Thessaloniki which has a long history of over 2300 years and presents numerous historical sites blended remarkably within the modern city. I'm looking forward to seeing you!

With kind regards,

Athanasios A. Devliotis
President of Thessaloniki Dental Society

of patients with this condition. Objective The aim of our paper is to present a case of bilateral leukoplakia of oral mucosa and to review diagnosis and management of oral leukoplakia according to the literature until now. Material and methods We present a 61 years old male with non-homogenous multifocal oral leukoplakia. Results Clinical evaluation (extraoral and intraoral) of patient and pathohistological findings of both lesions confirms the diagnosis – leukoplakia of oral mucosa without dysplasia. The patient was treated in nonsurgical manner. Conservative treatment includes use of chemopreventive agents such as vitamins (vitamins A, C, E), fenretinide (Vitamin A analogue), carotenoids (beta-carotene, lycopene), curcumin. The patient was followed up regularly until now without any signs of malignant transformation. Conclusion Management of oral leukoplakia should begin with elimination of risk factors (if any) such as tobacco abuse, betel chewing, alcohol abuse, superimposed candida infection over the lesion etc. Key words: oral leukoplakia, multifocal, management

The aim of this study was to review of the use of antiseptics and disinfectants in selected hospitals over five year's period. The data were collected from hospitals in Strumica, Ohrid, Veles, Stip and Kavadarci over five years. The data from the annual reports for disinfectants and antiseptics (Bactosal, Ecosal, Dezintal, Betadine, Hydrogen peroxide, Formaldehyde, Ethanol) used on the selected departments for gynecology, surgery and transfusion were collected. The results of microbiological testing conducted by the public health centers in Strumica, Ohrid, Veles, Stip and Kavadarci over five years were collected and used. Routine testing period for microbiological controls in hospitals was 15 days. In general the disinfectants and antiseptics are used optimally and correctly according to the needs of the hospitals investigated. The amount of disinfectants and antiseptics consumed comparing with the microbiological data indicates their rational utilization starting from 2012. Use of disinfectants according to the standardized procedures established by the IHI times allows current daily care for patients and staff in the hospitals investigated. The processed data from public health centers confirm the above and point out the precautions to be taken when conditionally pathogenic bacteria have been detected. It is pointed out the role of IHI times in the hospitals, as well as the role of hospital pharmacists. We would like to suggest the implementation of disinfection process validation as standardization measure as well as more often routine microbiological controls in the hospitals.
