Aim:

The main aim is to present the composite laminates, such as modern means used in aesthetic dentistry for the correction of minimal irregularities. Also with this case we want to present the advantages of dental laminates.

Clinical case:

It is the patient who was not happy with his smile. We made composite laminates for 12 and 22 in maxilla and to improve his smile, and we got a very satisfied patient and perfect smile.

Conclusion:

The advantages of the laminates are those that they are the latest choice for the patients that are looking for a perfect smile from a reason that with a proper care they can last a long time, and the need care as natural teeth, making is fast, and the results-perfect smile.

Key words:

composites, laminates, aesthetics, advantages, smile.
