## **HONORARY PRESIDENT**

**Prof. Dr. Vullnet Ameti**

Rector of University of Tetova / Republic of Macedonia

## **CONFERENCE CHAIR**

**Prof. Dr. Fauzi Skenderi**

Dean of the Faculty of Natural Sciences and Mathematics

## **CONFERENCE COORDINATOR**

**Asst. Prof. Dr. Arianit A. Reka**

Vice-dean of the Faculty of Natural Sciences and Mathematics

## **SECRETARY OF THE CONFERENCE**

**Hatixhe Bajrami**

Secretary of the Faculty of Natural Sciences and Mathematics

## **SCIENTIFIC COMMITTEE**

Prof. Dr. Memet Karatash - Turkey

Prof. Dr. Stojan Rendevski - Arab Emirates

Prof. Dr. Kostin Badica - Romania

Prof. Dr. Mladen Kucinic - Croatia

Prof. Dr. Nail Draga - Montenegro

Prof. Dr. Betim Cico - Albania

Prof. Dr. Otilia Sedllak - Serbia

Prof. Dr. Damir Kalpic - Croatia

Prof. Dr. Ferhat Jabeen - Pakistan

Prof. Dr. Blagoj Pavlovski - Macedonia

Prof. Dr. Petre Makreski - Macedonia

Prof. Dr. Ismet Hashani - Kosovo

Prof. Dr. Fatmir Hoxha - Albania

Prof. Dr. Nexhbedin Beadini - Macedonia

Prof. Dr. Sabri Laci - Albania

Prof. Dr. Naim Syla - Kosovo

Prof. Dr. Shpejtum Bulliqi - Kosovo

Prof. Dr. Mohammad Mouradi - Iran

Prof. Dr. Kremana Stefanova - Bulgaria

Prof. Dr. Agim Haziri - Macedonia

Prof. Dr. Agim Shabani - Macedonia

Prof. Dr. Bashkim Ziberi - Macedonia

Prof. Dr. Fisnik Dalipi - Norway

Prof. Dr. Alit Ibraimi - Macedonia

Asst. Prof. Dr. Florim Idrizi – Macedonia

## **ORGANIZING COMMITTEE**

Prof. Dr. Resul Hamiti - University of Tetova  
Asst. Prof. Dr. Fadil Ajredini - University of Tetova  
Asst. Prof. Dr. Flamure Sadiki - University of Tetova  
Asst. Prof. Dr. Florinda Imeri - University of Tetova  
Asst. Prof. Dr. Ahmed Jashari - University of Tetova  
Asst. Prof. Dr. Festim Halili - University of Tetova  
Mr.Sc. Besnik Rexhepi - University of Tetova  
Mr.Sc. Shkurte Luma-Osmani - University of Tetova  
Mr.Sc. Emin Durmishi - University of Tetova  
Mr.Sc. Nexhibe Sejfulli - University of Tetova  
Mr.Sc. Ramadan Aliti - University of Tetova  
Mr.Sc. Ajten Rushiti - University of Tetova  
Blerim Emini - University of Tetova  
Egzon Ademi - University of Tetova  
Mireme Rushiti - University of Tetova

## Abstract

Ore mineralization of Sb-As-Tl-Au in the Alsar deposit are localized in different type of lithological units like tuffs, dolomites, silicified dolomites and tuffaceous dolomites. The tuffaceous dolomite (probably from the Tertiär) lie discordantly over the Mesozoic basic rocks in the larger part of the north and south-west parts of the region. The appearances are bright-gray, gray-white to bright-brown colored. They are built up fine-crystallized dolomite which contains variable quantities of very fine granulated gray-white volcanic ash or tuffaceous material. Tuffaceous dolomites form massive, bright colored sampled which most frequently appear on the east side of the river. Most of them are strongly tectonized and broken, hydrothermally changed and rather eroded (due to the physical inhomogeneity) and have psefitic structure. The hydrothermally changed appearances are often corroded by the yellow to yellow-brown iron oxides. These massive appearances show very small signs of stratigraphic relations with the Pretertiary stratigraphic parts. The mentioned appearances discovered in the central parts of the region, north from the antimony holes, clearly points to their yang volcano-sedimentary localization. Here, the massive tuffaceous dolomites contain local intercalations of fine-grinded tuffs, wet ash or volcanic glass. The layers are about 2 cm up to 3 m thick.

Stratigraphic thickness of the tuffaceous dolomites is unknown, but according to the extent of uncovering in the north parts of the region, the thicknesses estimated to be from 100 to 125 m.

Investigations by the SEM-EDS technique revealed that tuaffaceous dolomites are very common lithological unit for ore mineralization for arsenic and thalium. Tuffaceous dolomites are mainly composed by the grain of dolomites and grain of volcanic glass-tridimitite.

**Keywords:** Alsar, tuffaceous dolomites, orpiment, volcanic glass.
