Introduction

Organic acids are important compounds influencing the stability, flavor, aroma and color of grapes and wine and contributing to the pH, chemical and microbiological stability of the wines. Main organic acids in wine are: tartaric, malic, lactic, succinic, citric and shikimic acids (Fig. 1). Therefore, monitoring during the whole vinification process: starting from the grapes juices, continuing to the alcoholic fermentation and wine stabilization processes, is necessary.

➤ The aim of the work was to evaluate the organic acids composition of Vranec wines produced in different wine regions in Republic of Macedonia, applying capillary electrophoresis hyphenated to mass spectrometry as well as an accurate-mass quadrupole time-of-flight mass spectrometer (QTOF-MS) [1].

Materials and methods

Wine samples: Vranec wines from different wine regions produced in experimental winery; grapes: 100 kg, traditional winemaking

Sample preparation: Wine diluted with deionized water (ratio 1:5), filtered with a 0.22 µm membrane filter (PVDF syringe filter, Nantong FilterBio Membrane Col, Ltd, China) and injected into the capillary electrophoresis system.

CZE-ESI/QTOF-MS instrumentation

➤ 7100 Capillary Electrophoresis (CE) system (Agilent Technologies, Waldbronn, Germany).

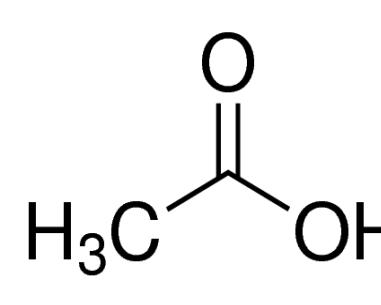

➤ Detection: 6530 Accurate-Mass Quadrupole Time-of-flight Mass Spectrometer (QTOF-MS) coupled to the CE instrument.

➤ Separation – Capillary: 80 cm x 50 µm internal diameter, fused-silica capillary (Polymicro Technologies, Phoenix, USA).

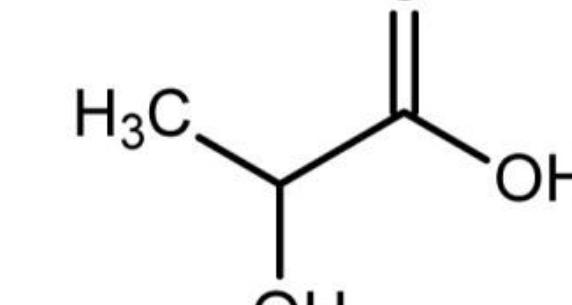

➤ 1% (v/v) solution of formic acid, sheath liquid

Chemical structure of organic acids in wine

a) Monoprotic acids

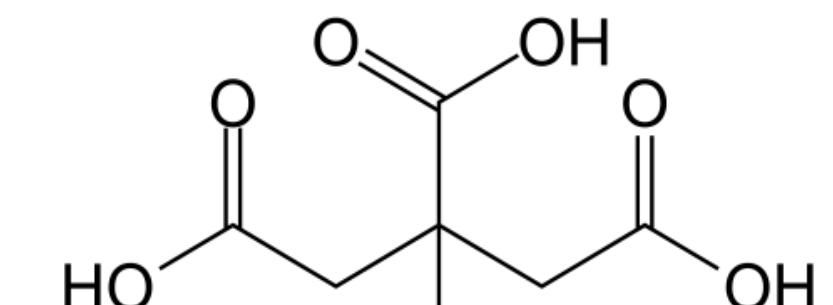

Acetic acid

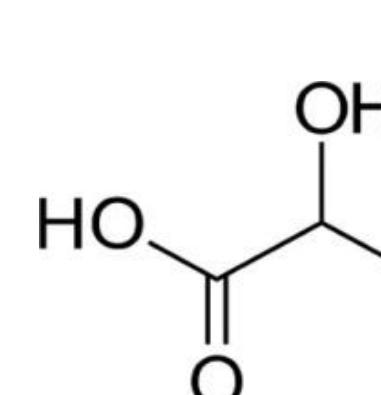

Lactic acid

c) Triprotic acids

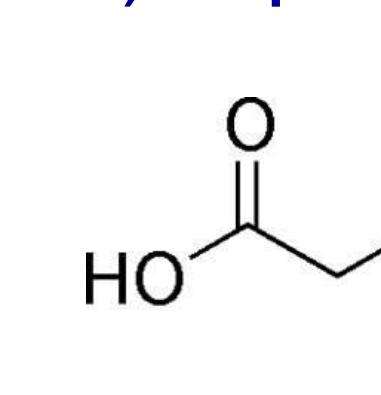

Citric acid

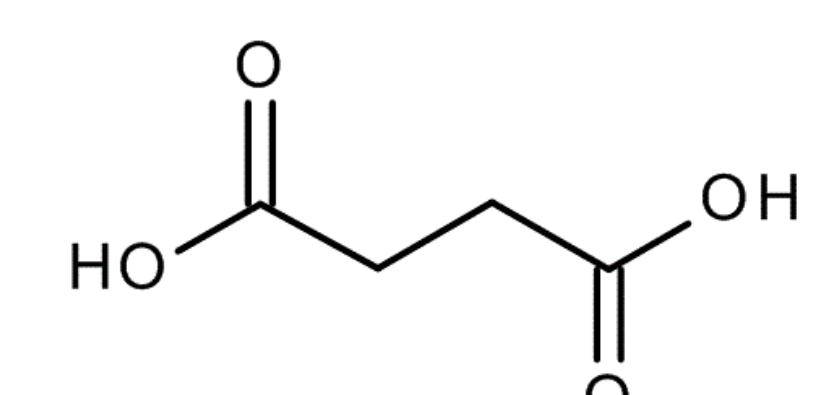

b) Diprotic acids

Tartaric acid

Malic acid

Succinic acid

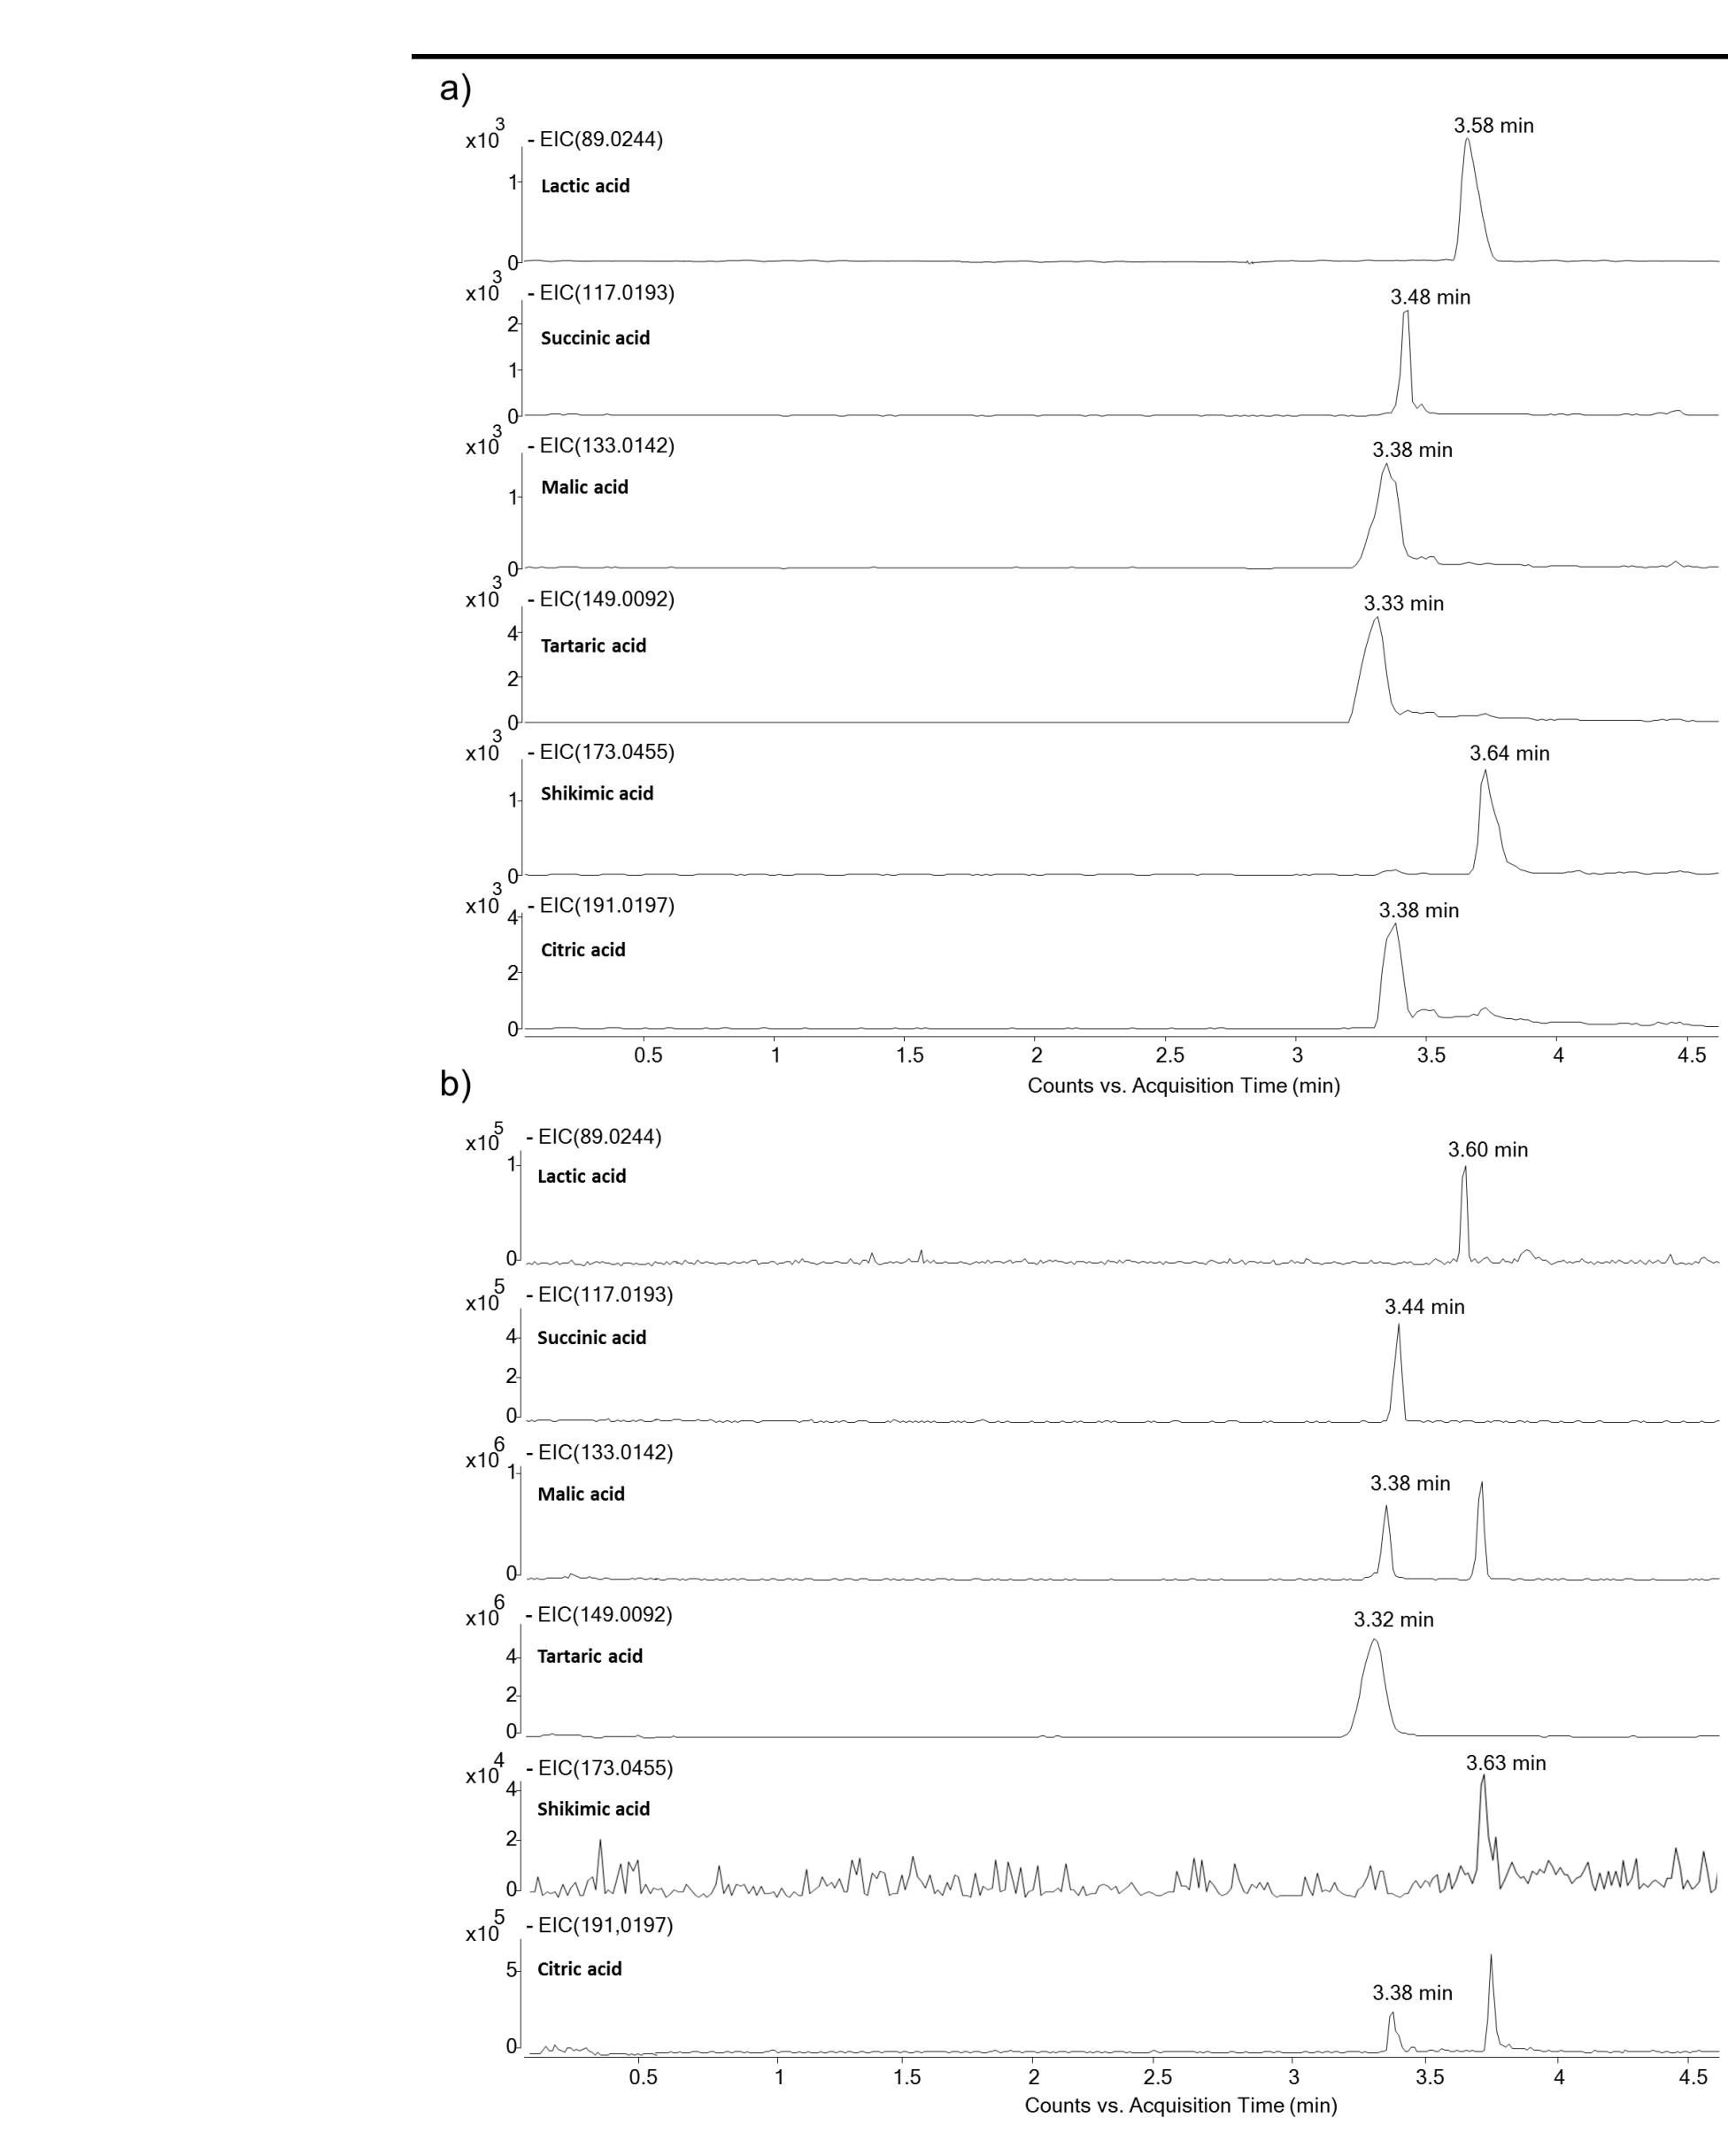

Results and discussion

Content of organic acids (mM) in Vranec wines

Wines	Tartaric (mM)	Malic (mM)	Lactic (mM)	Citric (mM)	Succinic (mM)	Shikimic (mM)	Total acids (mM)
V1	37.4±6.18	2.48±0.43	5.64±1.05	1.88±0.13	4.80±1.16	0.16±0.01	52.37±8.96

Conclusion

- wide variation of organic acids content
- relatively high concentration of tartaric acid, typical for this variety.

Extracted ion electropherograms of organic acids (a) standards (100 mg L⁻¹), and (b) the in Vranec wine V1
