THE BENEFITS OF LEARNING MORPHOLOGICAL CELL IMAGE ANALYSIS FOR MEDICAL STUDENTS

POSSIBILITY FOR FAST AND PRECISE ANALYZING

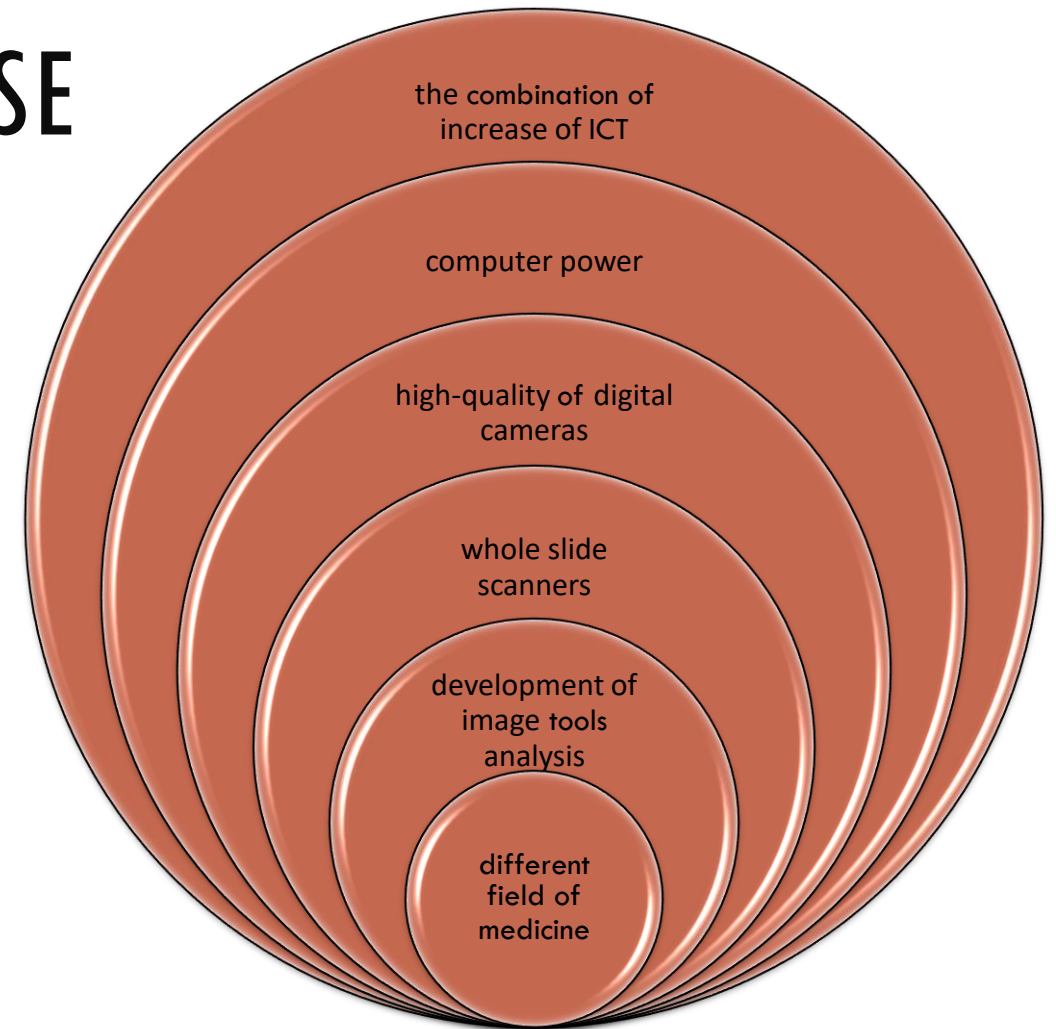

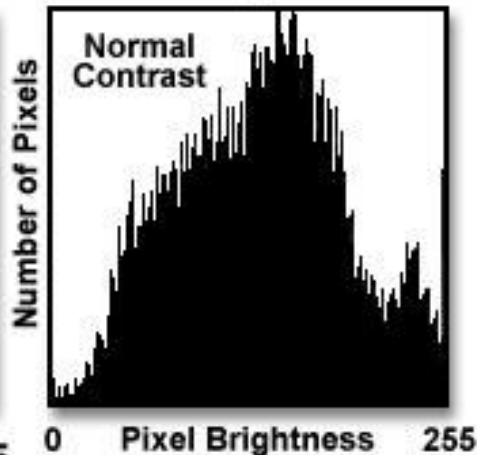

Contrast Enhancement by Histogram Stretching

IMAGE ANALYSIS

MEDICAL STUDENTS IN THEIR PRACTICE

Aims: observe the benefits of learning morphological cell image analysis

course of cytology and histology

free downloaded software (Digimizer, Image tool ets.)

COMPARATION

Subjectivity (analysis “on foot”)

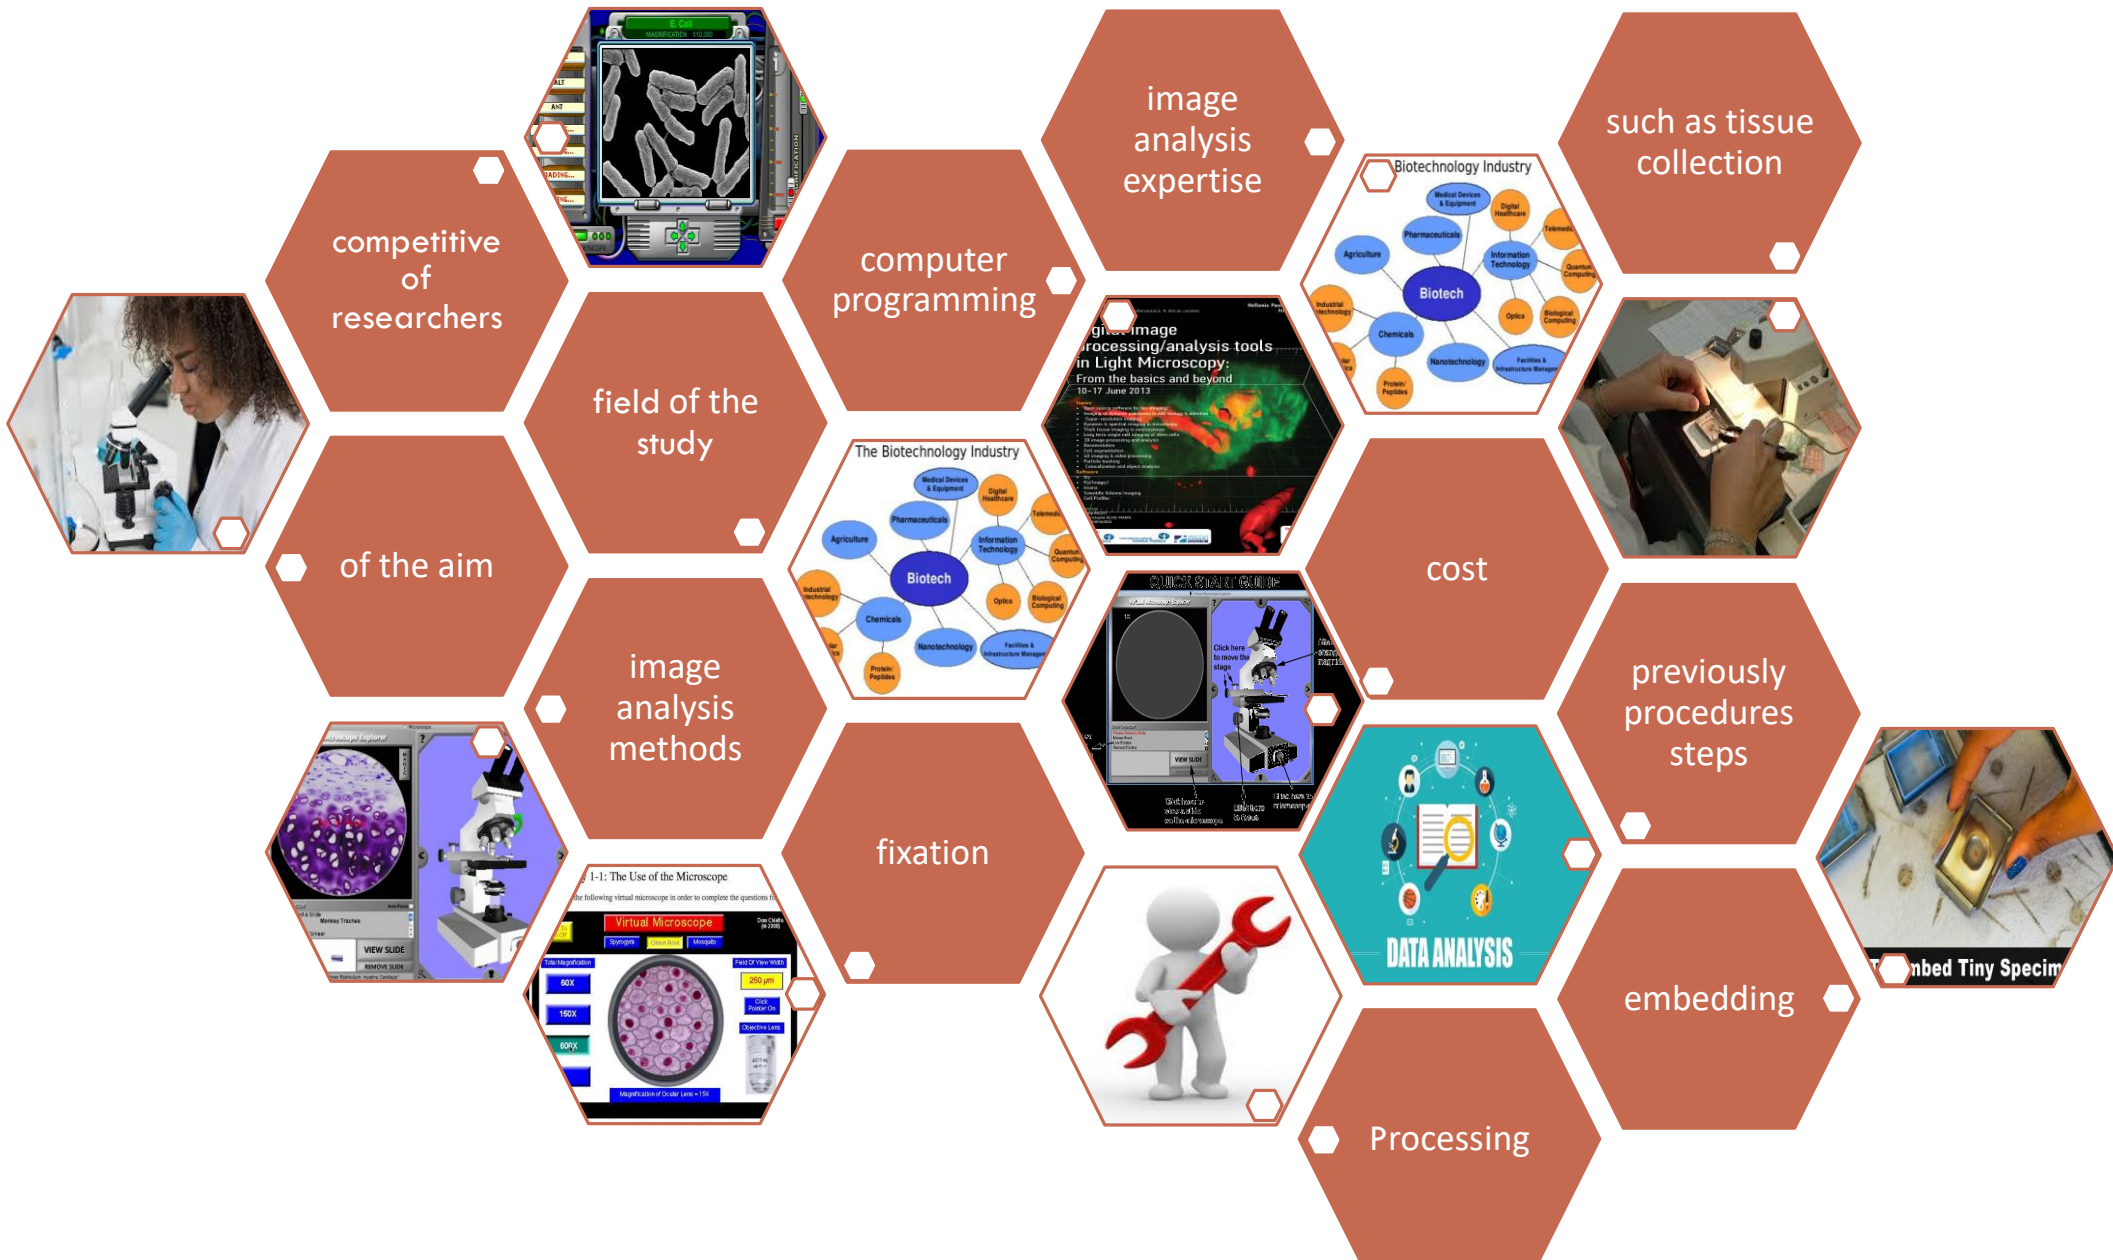

involves the risk for human errors

Subjectivity in interpretation of the results and report

Image tools analysis

APPROPRIATE IMAGE TOOLS ANALYSIS IS DEPENDENT

THE GOAL OF IMAGE ANALYSIS

to increase the amount and quality of data

automated mitotic detection carry prognostic value independent of other informations

nuclear/cytoplasmic ratio

nuclear area and shape

providing quantitative measurements of histologic features

define of cells or cellular

quantitative information relevant to some of the diagnosis can be the size, morphology and irregularity distribution of cells, or the ratio of cells as a diagnostic biomarker

Lab Activity 1-1: The Use of the Microscope

You will need the following virtual microscope in order to complete the questions for this activity.

MEDICAL STUDENTS IN THEIR PRACTICE

Applications of
whole-slide
imaging

rapid
transmission of
the data basis
for
consultations

Collaborations

standardization

distribution of
the materials
for education

tissue
specimen
archiving

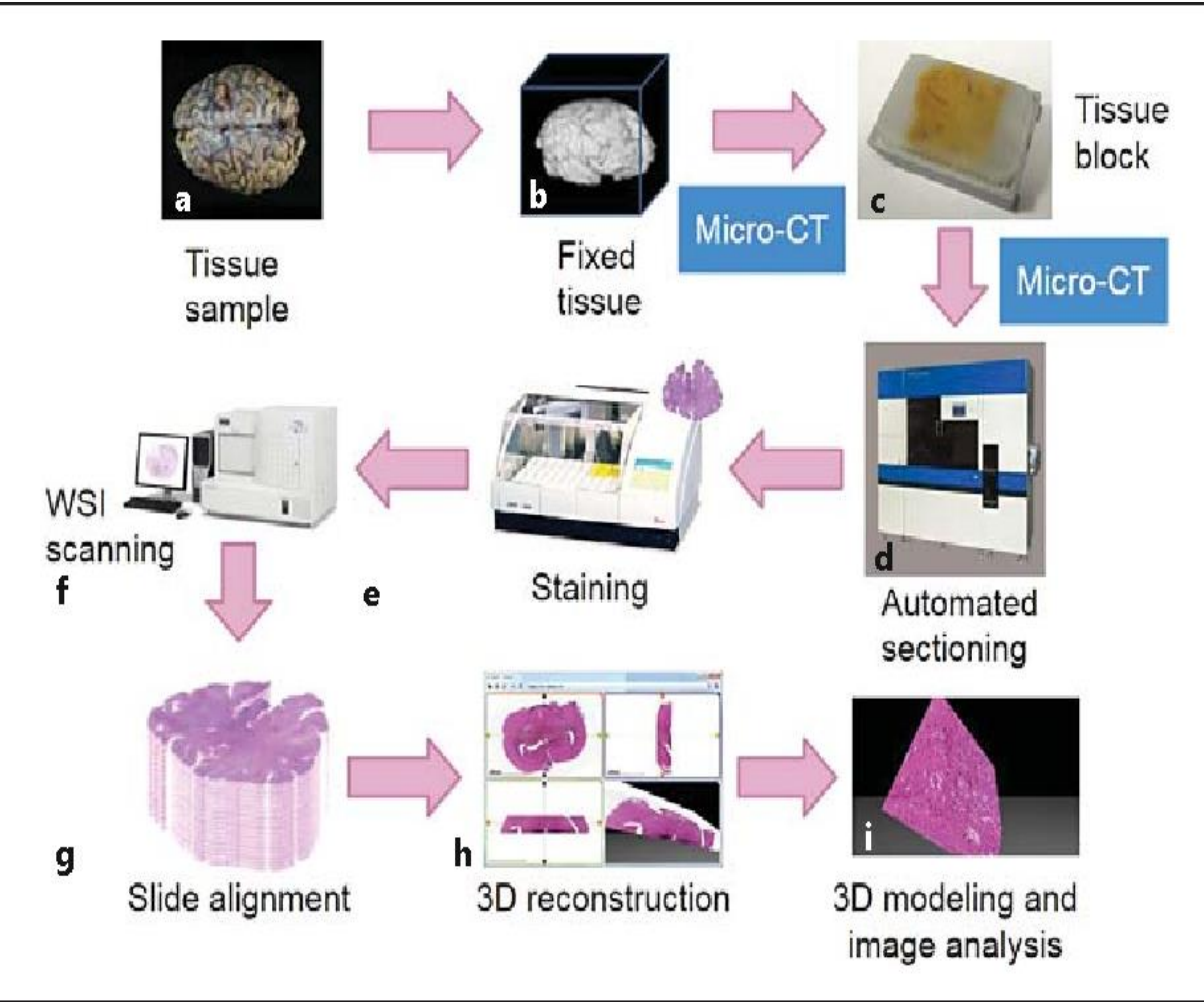

image analysis
of histologic
specimens

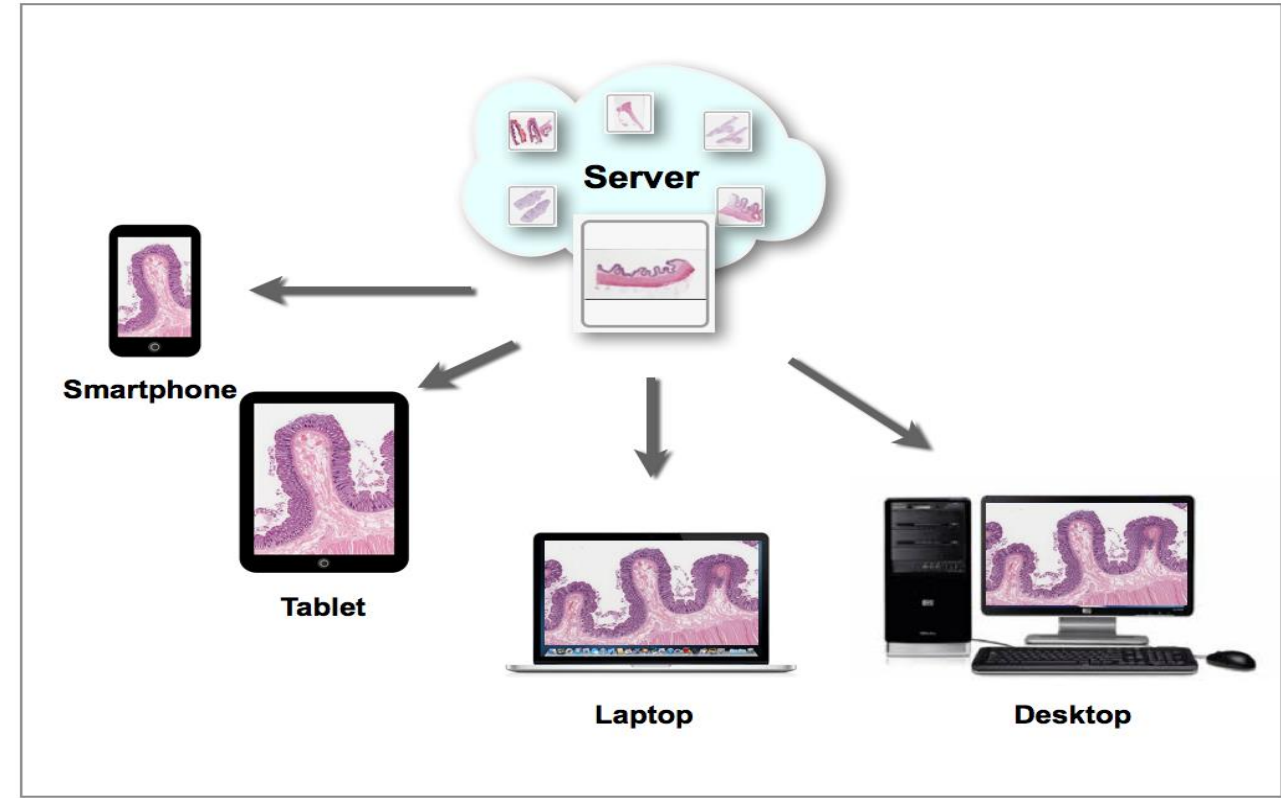

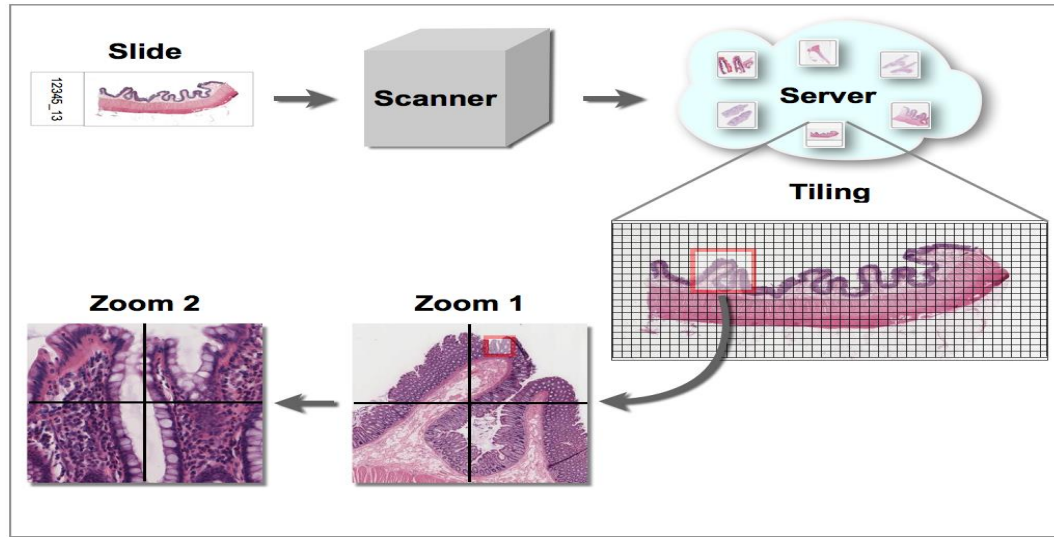

- histologic tissue sections can be created
- placed on web servers
- made available to the entire student population
- in medical training and practice in histopathology
- creates unique learning opportunities
- evaluation of histologic specimens on screens
- increases interactions between students

MATERIAL AND METHODS

- virtual microscopy
- on-line access to entire scanned sections of tissue
- can be viewed on a computer in exactly the same way as conventional glass slides
- can be explored by the learner at several magnifications
- It is provide substantial educational benefits especially to part-time students

Digital image file sizes vary from approximately 200 MB to 1 GB.42. The last version of the software Digimizer 4.3.0 can be free download <https://digimz.net/en/download/download/>

easy-to-use

flexible image analysis software packages

that allows precise manual measurements

automatic object detection

measurements of object characteristics.

Supported file formats are JPG, GIF, TIFF, BMP, PNG, WMF, EMF and DICOM file

developer of medical and statistical software

product of MedCalc Software

IMAGE ANALYSIS SOFTWARE DIGIMIZER

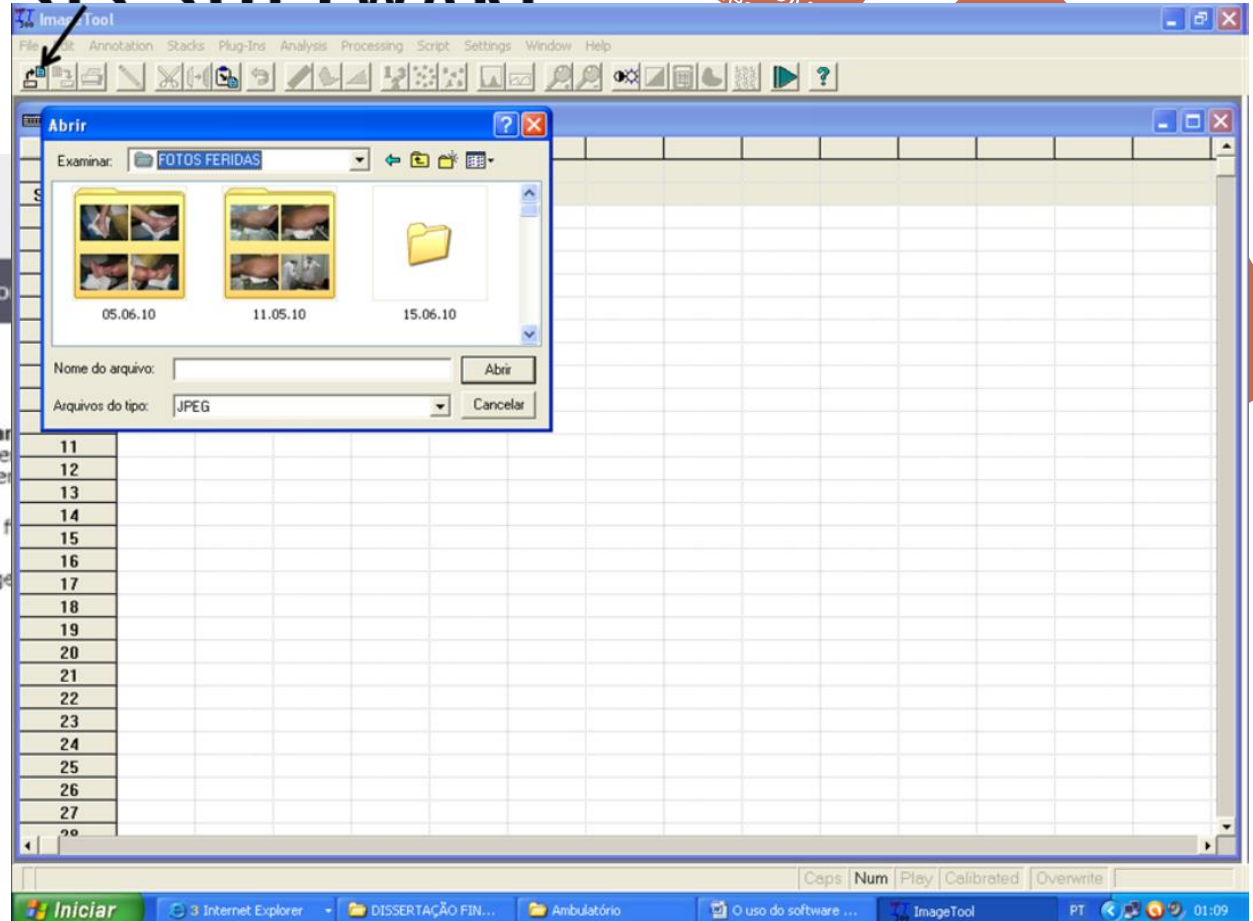

Easy-to-use image analysis software

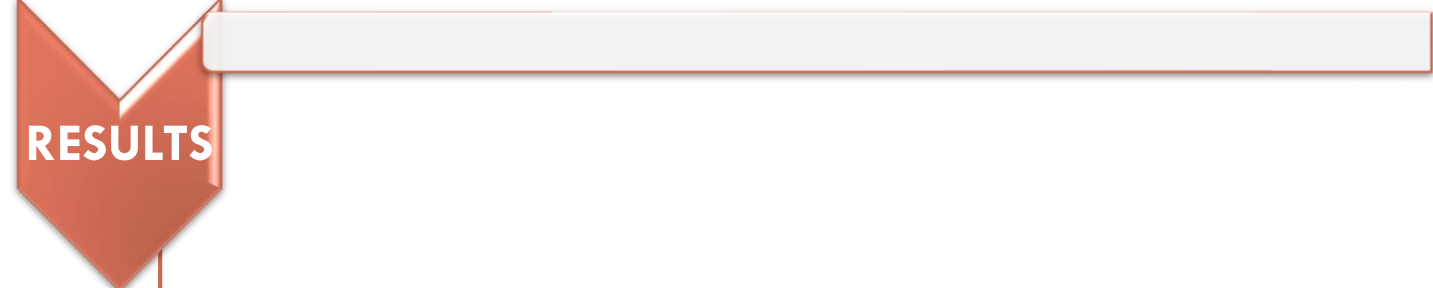

Digimizer is an easy-to-use and flexible image analysis software package that allows precise manual measurements and automatic object detection with measurement of object characteristics.

Pictures may be X-rays, micrographs, etc. Supported file formats are JPG, GIF, TIFF, BMP, PNG, WMF, EMF and DICOM files.

Images can be rotated, flipped or straightened. Image filters can be applied.

See: [program features](#).

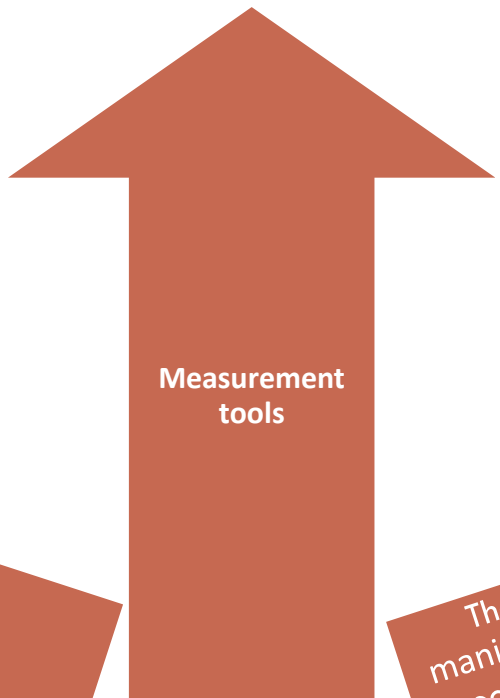

RESULTS

The screenshot shows the Digimizer software interface. The main window displays a microscopic image of human lymphocytes. A scale bar indicates 50 μm. The software has measured several parameters, which are listed in the 'Measurements list' and 'Statistics' panels.

Measure...	Area	Perime...	Length	Angle	Radius	Unit
Unit			273,786			pic...
Middle			1,422			μm
Length			0,840			μm

Tool	Measure	n	Mean	SD	Min	Max
Length	Length	1	0,8403		0,840	0,840
Middle	Length	1	1,4216		1,422	1,422

mesurments of the lengths of human lymphocites

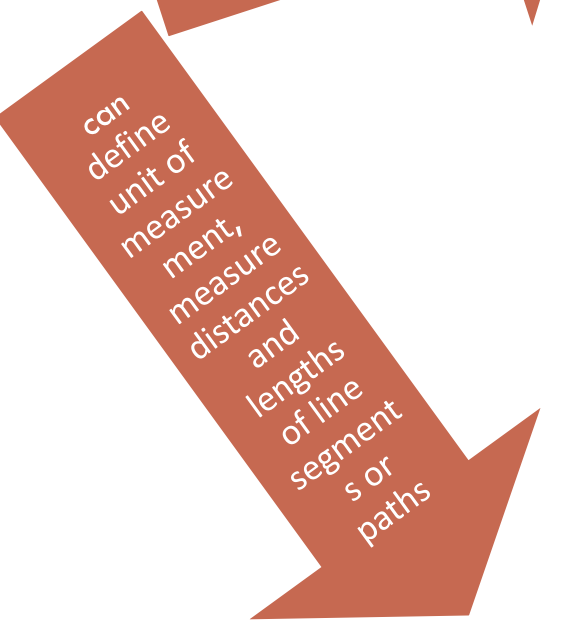

Measurement tools

The Image can be manipulate, resize, crop, zoom, stretch histogra, convert to grayscale na color ets.

perimeters, area, angles, find center and calculate characteristics of circular objects ets.

can define unit of measure, measure distances and lengths of line segments or paths

MESURMENTS OF THE CENTER AND CALCULATE CHARACTERISTICS OF HUMAN LYMPHOCITES

object
detection

measurement
of perimeter
and area

The screenshot shows the Digimizer software interface. The main window displays a histological image of human lymphocytes. Three lymphocytes are highlighted with green outlines. A scale bar in the top left of the image indicates 20 μm. The software's 'Measurements list' table is visible on the right side, showing the following data:

Measurem...	Area	Perime...	Length	Angle	Radius	Unit
Area	14210,2...	434,688	147,371			px
Area	20832,1...	529,734	181,338			px
Area	32686,1...	659,539	229,338			px

Below the measurements list, there is a 'Statistics' table:

Tool	Measure	n	Mean	SD	Min	Max
Area	Area	3	22576,1...	9360,56...	14210,2...	32686,1...
	Perimeter	3	541,3204	112,8723	434,688	659,539
	Length	3	186,0156	41,1831	147,371	229,338

The software interface also shows a Windows taskbar at the bottom with various application icons and a system tray showing the date and time as 20:44 on 15.08.2019.

Examples of different magnifications of a histological sample

NUCLEAR/CYTOPLASM RATIO IN HUMAN LYMPHOCITES

Measurements list

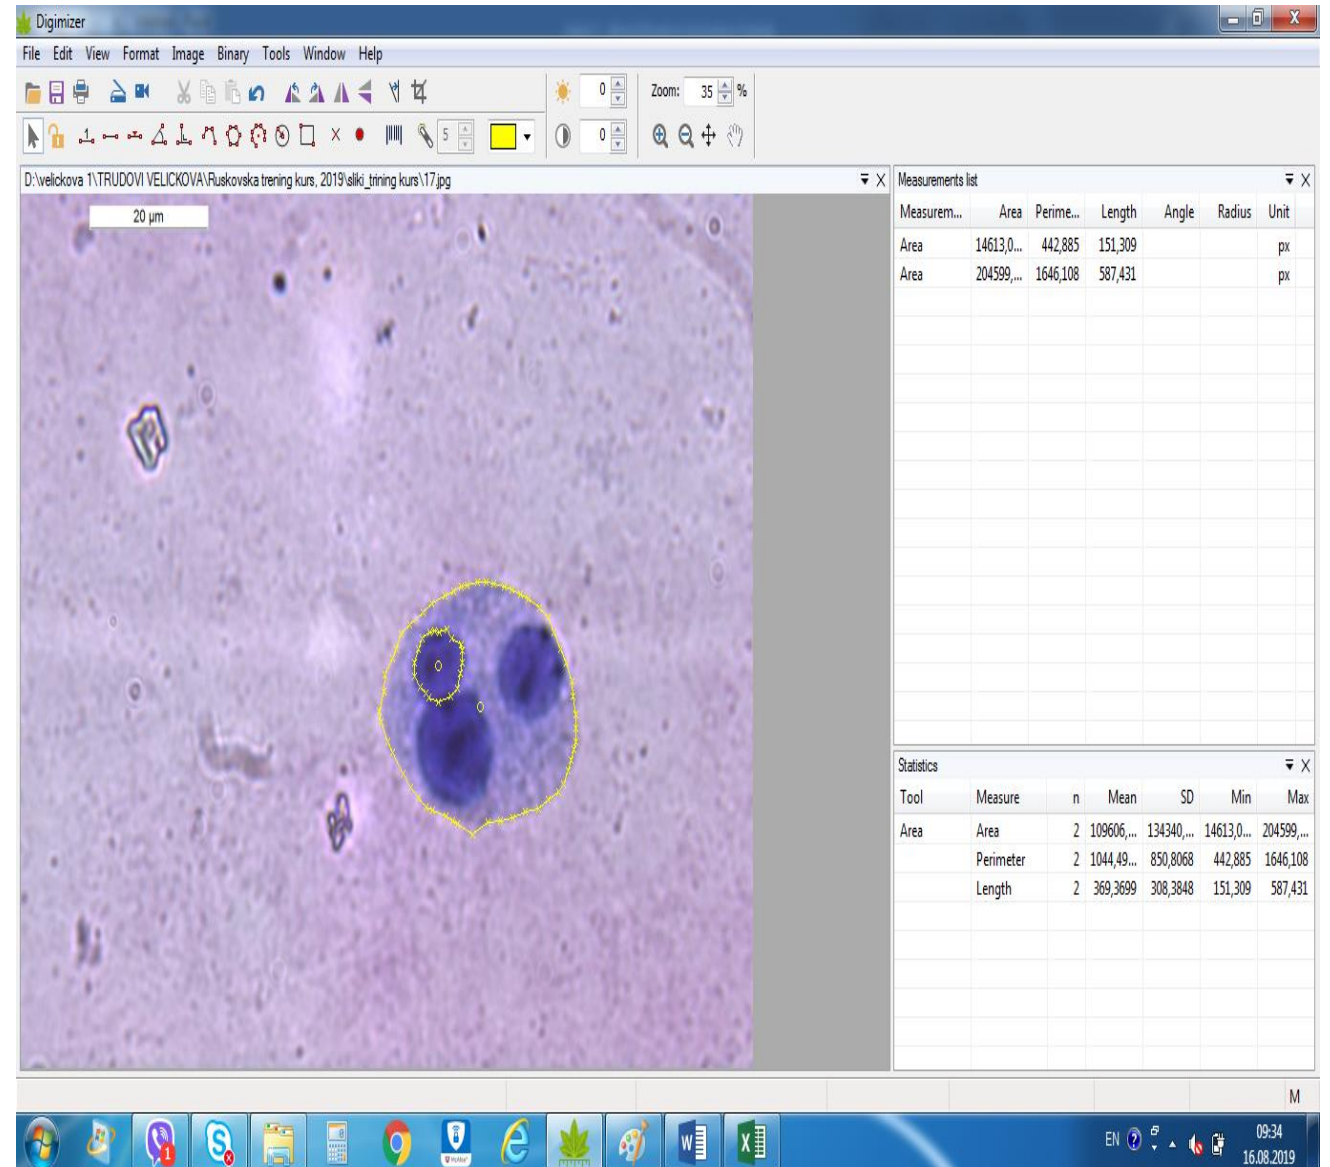

cell morphology, size, dimensions, especially nuclear/cytoplasm ratio

displays statistics (n, mean, SD, minimum and maximum)

Different forms of single nuclei

Different forms of touched, overlapped or clustered nuclei

Measurements list

Measure...	Area	Perime...	Length	Angle	Radius	Unit
Area	14613,0...	442,885	151,309			px
Area	204599,...	1646,108	587,431			px

Statistics

Tool	Measure	n	Mean	SD	Min	Max
Area	Area	2	109606,...	134340,...	14613,0...	204599,...
	Perimeter	2	1044,49...	850,8068	442,885	1646,108
	Length	2	369,3699	308,3848	151,309	587,431
