CONTEMPORARY APPROACHES AND CHALLENGES IN DENTISTRY

President of BaSS Congress 2019
Assoc. Prof. Dr. Edit Xhajanka
Dean Faculty of Dental Medicine
Tirana, Albania

Dear highly esteemed colleagues and friends,

It is a great pleasure for us to invite you to participate in the 24th Congress of Balkan Stomatological Society (BASS), 9- 11 May 2019, in Tirana, Albania, for the third time.

Recent changes have turned this city into a European metropolis, so we are excited to have your international presence here, to expand upon our collective scientific endeavour.

This is an ideal opportunity to exchange professional experiences and deepen our knowledge, through lectures and presentations on the latest technology and contemporary achievements in the field of dentistry. Also, the magic of a Congress is “communication”. The personal dialogue, the joining up with colleagues, networking and the direct discussion is of highest value.

I would like to invite you to participate in this important event of dentistry, where you will communicate with the international language of science, but also you will have the possibility to enjoy the hospitality, the virtues and the wonderful nature of Albania.

I wish a successful Congress and enjoyable staying in Tirana.

Kindest regards!

Congress President

Assoc. Prof. Dr. EDIT XHAJANKA

BaSS President
Prof. Dr. Argirios Pissiotis

Dear distinguished members of the Balkan Stomatological Society,
Dear Colleagues in the Balkan Countries,

It is my pleasure to invite you to attend the 24th Congress of the Balkan Stomatological Society (BaSS) which will be organised this year in Tirana, Albania at the Tirana International Hotel and Congress Centre on the 9th through the 11th of May 2019, under the Presidency of Assoc. Professor Dr. Edit Xhajanka .

The Balkan Stomatological Society (BaSS) following its tradition of more than twenty years in organizing, as per its constitutional obligation, another annual Congress with the purpose of bringing together dentists from all the Balkan countries to exchange scientific knowledge and share clinical experiences for the benefit of the oral health care of the people residing in the Balkans.

The chosen theme of this Congress is “Contemporary Approaches and Challenges in Dentistry”. This addresses treatment modalities that have been developed based on the modern materials and devises that are used in contemporary Dentistry. The implementation of treatment approaches based on the use of new technologies tends to change the shape of Dentistry of the 21st century, and the provision of oral healthcare to our patients.

This Congress has also another purpose except the pure scientific one and this is the opportunity it will provide once more, to bring together dentists from the Balkan and other European countries to spend a long weekend together socialising, meeting old friends, making new ones enhancing communications between professionals from the Balkan area and Europe.

With this message I would like to wish my dear friend and colleague Assoc. Professor Dr. Edit Xhajanka and her team a great success with the organisation and extend an invitation to all the colleagues to come to Tirana this coming May.

With Kind Regards,

Prof. Argirios Pissiotis

TIRANA

Vital and colorful Tirana... The capital of Albania may seem crazy and hectic, but at the same time – peaceful and preoccupied. Tirana perfectly reflects every period of the country's history: Ancient Illyrian, Ottoman rule, World War I, World War II, communism and modern days. Colorful buildings combined with abandoned Soviet buildings give an impression of a constantly shifting city. The beautiful, but at the same time unpolished, city is surrounded by hills, has four beautiful artificial lakes and the Adriatic Sea in the distance. Having undergone a transformation of extraordinary proportions since it awoke from its communist slumber in the early 1990s, Tirana is now unrecognizable, with its buildings painted in horizontal primary colors, and public squares and pedestrianized streets a pleasure to wander. Trendy Blloku buzzes with well-dressed nouvelle bourgeoisie hanging out in bars or zipping between boutiques, while the city's grand boulevards are lined with fascinating relics of its Ottoman, Italian and communist past – from delicate minarets to loud socialist murals. Loud and colorful - Tirana is never dull.

Tirana is a city with a rich history dating from the Paleolithic times back 10,000 to 30,000 years ago to the present day. The oldest settlement located in the area of the city was the **Pellumbas Cave**, in today's village of Pellumbas. Tirana and its suburbs are filled with ancient Illyrian toponyms as its precincts are some of the earliest regions in Albania to be inhabited. One of the ancient monuments, the Tirana Mosaic, is believed to have been part of a 3rd

century ancient Roman house referred to by local archeologists as the Villa Rustica. Later, in the 5th and 6th centuries, a Paleo-Christian Basilica was built around this site. Your visit can start with ancient Tirana and continue with other historical places like the walls of the Castle of Tirana built by Justiniano;

the memorial of the defender of Christianity, Scanderbeg, in the homonymous square; the Mosque of 'Ethem Bey', founded in 1792 by Mulla Bey of Petrela, son of one of the prominent families of the Tirana area and it was his son, the poet Ethem Bey that finished it in 1821. The mosque was closed during the communist period and then re-opened in 1991. You can also visit the Clock Tower, the Tanners' Bridge, the Kapllan Pasha's tomb, the founder of Tirana; the Palace of Brigades built as the residence of King Zog, used for the first time by the Minister of Foreign Affairs, Count Ciano, as his residence during the Italian invasion of Albania; the residence of Toptani family with its Baroque architecture from the Ottoman period of the eighteenth century; the former home of the Albanian painter Sali Shijaku along with its 100 paintings gallery; the house of Buneci family, copper craftsmen.

In Tirana you can find the most important museums in the country: the National Historical Museum, the Archaeological Museum, the National Gallery of Arts and the newly opened museum, Bunk'Art, a fantastic conversion – from a massive cold war bunker on the outskirts of Tirana, into a history and contemporary art museum – is Albania's most exciting new sight.

The Great Park, which is located near **the Lake of Tirana**, offers entertainment opportunities as well as **the Rinia Park** (Park of Youth), in the city center, which has within the recreation complex "Taiwan".

Previously reserved only to members of the Communist Party, "Blloku"(**ex-Block**) has become a meeting point for young people in Tirana. It is today the fashionable part of the city with numerous cafes, bars and restaurants that have settled around the former residence of the Albanian dictator Enver Hoxha.

The neighborhood has a bar with small gardens as Charl's Bistro, or "Fusion Food" at Serendipity Café, where you listen to live music and cocktails are served. But it is not just the lively "Blloku" district to give the city a "youthful touch," it is also the average age of its inhabitants, 29, that makes Tirana a tourist's destination for young people.

For those who love the mountains, the nearest destination is the **Dajti Mountain**, 1,613 meters high, where you can enjoy the landscape, the nature, fresh air and especially the local cuisine. Lovers of water sports or beaches can visit the Adriatic coast, 30 km from Tirana. Here you can do different activities such as swimming, diving, surfing, fishing and playing volleyball. For those looking for a fascinating itinerary, it is interesting to visit the Fortress of Petrela, built in medieval times, in the south of Tirana and the Fortress of Preza, built in the fifteenth century, in front of Kruja Mountain.

Skanderbeg Square, the History

At the center of this square we can see the statue of the great Skanderbeg (George Kastriot Skenderbeu), the Albanian hero. For 25 years, from 1443 to 1468, his 10,000 man army marched through Ottoman territory winning against consistently larger and better supplied Ottoman forces. During the dictatorship, the statue of Albania's leader **Enver Hoxha** was erected in this square, also. But, in 1991, after the fall of communism, the statue would be removed amid student-led demonstrations. South we notice the institutional buildings, the offices of the town hall and some ministries painted in ocher and burgundy and east there is the minaret of one of the oldest **Mosques in Tirana** considered a cultural monument which was spared from the destruction unleashed by the communist regime in the late '60s.

Next to it, in typical socialist style, there is the imposing the **Palace of Culture** which houses a library and the **Opera House**, as well as a stylish bar and **The National Library of Albania**, where you can buy maps of the city and international books; its construction began in the 60s with the Communist regime and ended six years later, on the same site where once stood the old bazaar, which was forced to move.

On the north side of the square, past the pedestrian area with benches and trees, stands **The National Historical Museum**, the largest in the country, with the famous colorful mosaic depicting Albania and its victories, from the Illyrians to the Second World War. Observe palaces and monuments is not very easy, since the square, with only an auto-free zone in the center, is one of the main intersections of the noisy and chaotic city traffic. The best observation points are from the steps of the palace of culture, or in the middle of the oval green lawn, just below the equestrian statue of Skanderbeg. From these locations, you can calmly observe the urban and architectural developments of the most important part of the old town area, which represents the history and culture evolution of the city and of the entire country.

Inside the Mosque of ‘Ethem Bey’

The ancient heart of the Ottoman culture still beats in this sacred place, which, however, foreign travelers, also can easily access, greeted by a smiling caretaker. The mosque surprises for the beauty and sophistication of the interior decorations. It is one of the oldest mosques in Tirana, since it managed to survive the urban and stylistic transformations of the different political regimes. The construction of the mosque began in 1789 and was completed in 1821, while the decorations and frescoed landscapes date back to 1823. Before entering the Mosque, do not forget to admire the beautiful arched portico. The decorations can be seen under the arches of the mosque and also outside it, on the porch. The most impressive area is that of the **prayer room**, which is accessed through the front door. The hall is located just below the dome, whose interior is completely painted. In order to better admire the decorations, sit on one of the several carpets and look upward. The ground floor reserved for men, while women can only get on the gallery through a narrow staircase. If there are not any intransigent devotees though, even the women can enter the main hall.

Take a tour and eat at the **Bazaar**

I wonder why the markets rarely appear in traditional lists of must-see things in a city. For me, they are among the most interesting places to visit to soak in the culture and local traditions. **Pazari i Ri** in Tirana, now all new, is a large bazaar, a real feast for the eyes, nose and palate! It is located at the bottom of 'Luigj Gurakuqi' Street, on the left of 'Avni Rustemi' Square. Fresh fruit and vegetable in the main square, followed by other 'kiosks' where they sell a bit of everything from clothing to spare parts, from honey to wool slippers that women package at the moment. The market occupies several streets, with simple shops displaying the goods, even on the road. The area is occupied by fishmongers cooking on small grills fresh fish that customers can take home ready to eat. Some restaurants also offer the chance to eat there: an experience that I recommend to do absolutely, for at least three reasons: the food is fresh, there is a chance to have lunch with the inhabitants and the price is ridiculously low. The new Bazaar offers now a new stylish architecture with a glass roof that gives an excellent view of the communist housing blocks surrounding the market, which have been painted in traditional Albanian weaving motifs. Part of the market has been reserved for traditional crafts, and will certainly become a fixed pit stop for tourists.

Look for the **colorful communist** buildings

We've all seen, at least in a photo, the *socialist style* buildings, grey, large homogeneous blocks, all equal to each other and in Tirana you can find many of them. A few years ago, to renew the city and make it more attractive, the ex-Mayor Edi Rama who is the current head of government and also a painter gave Albania's capital city a vibrant makeover, full of color, '***I love the joy that color can give to our lives and to our communities***' Rama said. Today, these communist buildings are striped in reds, blues and greens while others feature designs that sprawl across their entire facades. There are three main areas where you can admire the painted houses: over the river along Boulevard 'Bajram Curri' after the *Bridge of Tanners*, in 'President Wilson' Square at the end of Blloku and 'Zogu i Zi' Square where you can find the bus stations leading to Durres and Kruja.

Understanding the past and present of the **Hoxha pyramid**

It was built to be the mausoleum that would have guarded the remains of *Enver Hoxha*, the dictator who remained in power from 1944 to his death in 1985. Designed by his daughter and his son in law - Hoxha, it was opened in 1988, but with the fall of the regime, it became first the seat of the international center of culture, then a disco and now a television station. Today, all that remains is the imposing concrete pyramid covered with graffiti and the kids that love to climb to the top and then slide down from one of the sloping walls. It is the 'memory land' of a dictator from whom Albanians have managed to break free too late, as they themselves admit. Born as an expression of boundless self-celebration of the dictator, who remained in power longer than any other, and that in this way wanted to hand down to posterity the greatness of his power, but became instead the symbol of freedom regained by the Albanian population.

A glimpse at the history of **'Mother Teresa' Square** and the **Polytechnic University of Tirana**

The last point refers to the first. **'Mother Teresa' square** (Shesi Nënë Tereza) is an open space that serves as a counterpoint to Skanderbeg Square. The two squares are joined through the connecting route of the Boulevard 'Zog I', along which lie the main institutional buildings of the city. Realized in the period of Italian occupation (at that time it was called Piazza Littorio), it is one of the most complete spaces I've ever seen built, in typical fascist style, by Italian architects. It was destined to be used for the training, culture and sport, while Scanderbeg Square at that time was the square of the Ministries. The buildings are still the same, but what changed is their contents and their names. The Polytechnic University , which dominates the square on the north side, is now the seat of the University of Tirana. On the side of the square, to its right, is the ex- **House of Youth Organization** or the **Youth House of the Albanian Littorio** which now houses on one hand, the **Rectorate** and the **University Library** and on the other the **Archaeological Museum**, while in front, on the other side of the square, there is the Academy of Fine Arts.

The things to see and do in Tirana do not stop here. But, these are the essential to start approaching and understanding a bit more about the varied history and culture of this city that does not hide its past, but on the contrary, it is increasingly extending into the future.
