CONTEMPORARY APPROACHES AND CHALLENGES IN DENTISTRY

**Messages**

President of 24th BaSS Congress

**Assoc. Prof. Dr. Edit Xhajanka**

Dean of Faculty of Dental Medicine, Tirana, Albania

## Messages

**Dear highly esteemed colleagues and friends,**

It is a great pleasure for us to invite you to participate in the **24th Congress of Balkan Stomatological Society (BASS) on 9-11th May 2019**, in Tirana, Albania, for the third time.

Recent changes have turned this city into a European metropolis, so we are excited to have your international presence here, to expand upon our collective scientific endeavour.

This is an ideal opportunity to exchange professional experiences and deepen our knowledge, through lectures and presentations on the latest technology and contemporary achievements in the field of dentistry. Also, the magic of a Congress is “communication”. The personal dialogue, the joining up with colleagues, networking and the direct discussion is of highest value.

I would like to invite you to participate in this important event of dentistry, where you will communicate with the international language of science, but also you will have the possibility to enjoy the hospitality, the virtues and the wonderful nature of Albania.

I wish a successful Congress and enjoyable staying in Tirana.

Kindest regards!

President of BaSS

**Prof. Dr. Argirios Pissiotis**

**Dear distinguished members of the Balkan Stomatological Society,  
Dear Colleagues in the Balkan Countries,**

It is my pleasure to invite you to attend the **24th Congress of the Balkan Stomatological Society (BaSS)** which will be organised this year in Tirana, Albania at the Tirana International Hotel and Congress Centre on the 9th through the 11th of May 2019, under the Presidency of Assoc. Professor Dr. Edit Xhajanka.

The Balkan Stomatological Society (BaSS) following its tradition of more than twenty years in organizing, as per its constitutional obligation, another annual Congress with the purpose of bringing together dentists from all the Balkan countries to exchange scientific knowledge and share clinical experiences for the benefit of the oral health care of the people residing in the Balkans.

The chosen theme of this Congress is “Contemporary Approaches and Challenges in Dentistry”. This addresses treatment modalities that have been developed based on the modern materials and devices that are used in contemporary Dentistry. The implementation of treatment approaches based on the use of new technologies tends to change the shape of Dentistry of the 21st century, and the provision of oral healthcare to our patients.

This Congress has also another purpose except the pure scientific one and this is the opportunity it will provide once more, to bring together dentists from the Balkan and other European countries to spend a long weekend together socialising, meeting old friends, making new ones enhancing communications between professionals from the Balkan area and Europe.

With this message I would like to wish my dear friend and colleague Assoc. Prof. Dr. Edit Xhajanka and her team a great success with the organisation and extend an invitation to all the colleagues to come to Tirana this coming May.

With Kind Regards,

President of Honor of the Congress  
**Prof. Dr. Norina Forna**

## Messages

The happy and honourable occasion offered by the **Albanian National Association of Dental Professionals** to organise the **24th Edition of the Balkan Stomatological Society Congress in Tirana** is a challenge thru developing more and more the scientific, educational and organisational valences of such an event and demonstrating once again by the large number of participants and speakers from all over the world.

The presence of the dentistry's elites, the diversity of existing themes in the congress, their practical applicability offers a wide range of interest, attention and attraction to the participant audience of all generations of practitioners - general practitioners and academics.

We will certainly remember the brilliant reference of the BASS editions, which we will be pleased with, both from the point of view of scientific quality and generous hosts who are active in a landscape, full with traditions and rich culture.

"We are what we do repeatedly, therefore excellence is not an action but a habit" - Aristotle

With friendship

## Messages

Dear friends, dear colleagues,

It is my great pleasure to be able to welcome you in Tirana, Albania, for the 24 Congress of Balkan Stomatological Society, on 9-11 May 2019. I believe that this congress will not only increase our scientific experience in the field of dentistry, but also make a contribution to improve our cultural relations.

We will offer scientists and practitioners the scientific and clinical platform to present and discuss their research results and clinical cases and to stay up-to date with the developments and new technologies in every field of dental medicine.

24th BASS Congress meeting in exciting and diverse Tirana city will most certainly bring us even closer together and further strengthen our friendship. This colorful city, well known for its value and hospitality towards guests, together with exciting social program insure another memorable BASS Congress.

I assume that all participant countries are very happy to share these warm feelings and friendship and be together again during the 24.th Congress. I greet you all and wish you success and good time all through this congress.

## Poster Presentations

230. DENTAL TRAUMA-THE MOST COMMON CAUSES AND THE TREATMENT .....129  
**Jovanka Trifunovic, Vladimir Biocanin**
231. IMMEDIATE IMPLANT SURGICAL INTERVENTIONS IN CASES WITH CHRONIC PATHOLOGY IN THE ORAL REGION.....129  
**Aldo Vangjeli**
232. COLOR STABILITY OF ACRYLIC ARTIFICIAL TEETH .....129  
**Darko Kocovski, Kiro Papakoca, Julija Zarkova-Atanasova, Katerina Zlatanovska, Verica Toneva**
233. SYSTEMIC THERAPY IN PERIODONTAL DISEASE .....130  
**Jolanda Taga, Dajana Taga, Eva Gavani**
234. HEALTH RELATED QUALITY OF LIFE AND SATISFACTION AFTER SURGICAL ORTHODONTIC TREATMENT IN TIRANA OMF SURGERY SERVICE.....130  
**Irina Isufi, Algen Isufi, Henerieta Veshaj, Ramazan Isufi**
235. THE EFFECT OF ADRENALINE WITH THE APPLICATION OF LOCAL ANAESTHETICS IN PATIENTS WITH INDICATED OPERATIONAL TREATMENT ON THE HEAD .....130  
**Dzenad Ganjola, Maja Delic, Danijela Subotic**
236. ORTHODONTIC-SURGICAL MANAGEMENT OF A PATIENT WITH DENTO-MAXILLOFACIAL ANOMALY .....131  
**Dr.Aurora Isufi, Dr.Renato Isufi , Prof.Dr.Ramazan Isufi\***
237. HEALING PROGRESS OF PERIAPICAL LESIONS AFTER ENDODONTIC NON-SURGICAL TREATMENT .....131  
**Florjan Zoto, Dorjan Hysi, Odeta Zoto\*, Filip Zoto\***
238. THE MOST FREQUENT SHADE, SELECTED FOR ARTIFICIAL TEETH, IN THE ALBANIAN POPULATION: REPORTING .....131  
**Erisa Bllakaj, Vigjilent Xhaferaj\*, Florian Xhaferaj\*, Ajola Nasti\*\*, Olta Alimema\*\*\***
239. CLINICAL COMPLICATIONS IN FIXED PROSTHODONTICS .....132  
**Katerina Zlatanovska, Natasa Longurova, Cena Dimova, Ivona Kovacevska, Sanja Naskova**
240. REMOVAL OF A MANDIBULAR CYST, SPONTANEOUS BONE REGENERATION FOLLOWING PROSTHETIC REHABILITATION WITH IMPLANTS. ....132

**Abstract**

**Background:** There are clinical situations where the space supposed to be occupied by the pontic is occupied by migrating adjacent and opposing teeth. One such situation arises when a mandibular molar has undergone root resection, in which one or more roots of a tooth are removed at the level of furcation while leaving the crown and remaining roots in function. The aim of these case report is prosthesis design of a hemisected mandibular molar.

**METHODS AND MATERIALS:** A female, 34 years old, had as the main symptom, pain in the lower right region. After proper examination, a periodical lesion of the tooth, including the furcation and severe bone loss in relation to the mesial root was diagnosed. The following treatment plan was designed: the endodontic treatment of mandibular molar, root resection and a fixed partial denture. It was examined the space among the two abutments in the diagnostic casts. Traditional laboratory steps for casting and porcelain were carried.

**CONCLUSIONS:** In the actual clinical case, the reduced space posed a challenge in planning the connectors and contours of the pontic. Traditional design of a fixed partial bridge in this case would obstacle self-cleansing potential of the prosthesis which in turn would initiate periodontal problem in the critical area present on the bisected root. root resection management is a multi-disciplinary approach and each case will have its limitations.

**Abstract**

Currently, there has been a growing demand for restoration of anterior teeth in the routine of doctors in dental offices. With advance in adhesive technology and good properties of the available ceramics, the use of ceramic veneers has been offered as a treatment option for cases where teeth have minor color changes and shape and position changes. Rehabilitation of patients with this kind of demands may present a challenge for clinical, especially when trying to mimic the nature with composite resins as neighbouring teeth.

Ceramic veneers have been extensively and successfully used to mask intrinsic staining, to give the appearance of straightening, and to correct moonier malformation of anterior teeth without the removal of substantial amounts of sound tooth substance. The long-term success and correct application of ceramic veneers.

The purpose of this case report was to describe a sequence of clinical steps, from planning to cementation, in a case of aesthetic correction using feldspathic ceramic veneers.

**KEYWORDS:** ceramic veneers, aesthetic dentistry, frontal teeth.

**Abstract**

The implantologist should strive to better optimize osteointegration, function and aesthetics, reduce the time of treatment to minimize the number of surgical interventions and quickly establish the suprastructure (tooth).

Immediate placement and restoration of the implant is a widely used protocol. The conventional protocol of placing implant and waiting for it to osseointegration is time consuming and compromises patients aesthetics and psychological comfort. This report presents a case of immediate placement and restoration of implant in the region with periapical infection.

**KEYWORDS:** Immediate placement, Restoration, Dental implant

**Abstract**

Management of internal root resorption is a challenge to the endodontists. It may occur in cases with chronic pulpal inflammation, following caries or due to trauma in the form of an accidental blow. They are asymptomatic and usually first detected radiographically. Odontoclastic multinuclear cells are responsible for the resorption, which can grow to perforate the root if untreated. Root canal treatment remains the treatment of choice of internal root resorption as it removes the granulation tissue and blood supply of the clastic cells. The prognosis for treatment of small lesions of internal root resorption is very good. If, however, the tooth structure is greatly weakened and perforation has occurred, the prognosis is poor and tooth extraction must be considered.

This paper is an attempt to summarize the knowledge on internal root resorption and present a case having resorptive defect, which was successfully managed with different treatment modalities.
