► 14-15 ОКТОМВРИ 2016 БИТОЛА

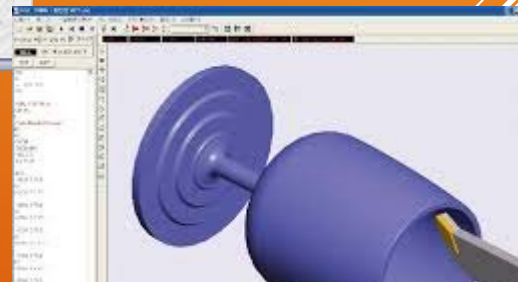

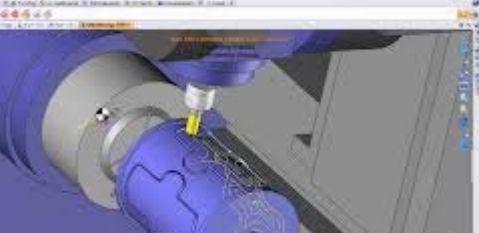

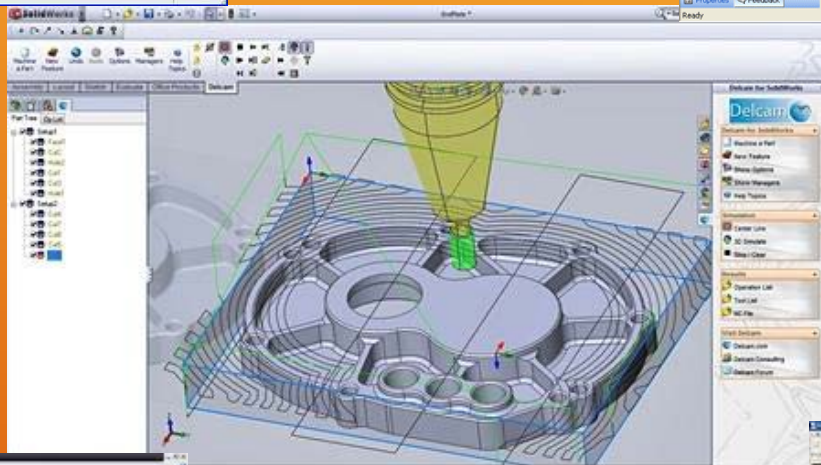

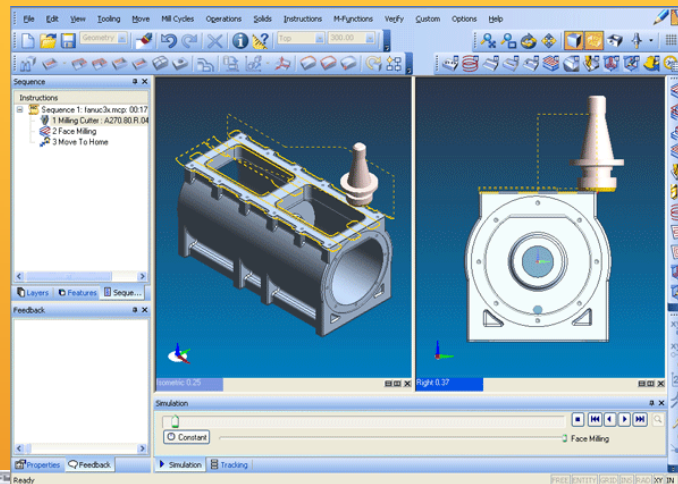

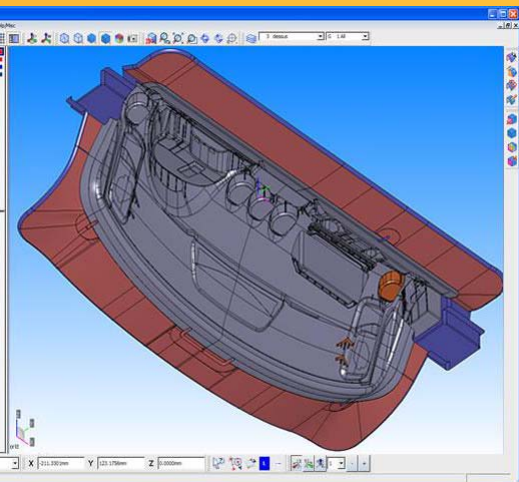

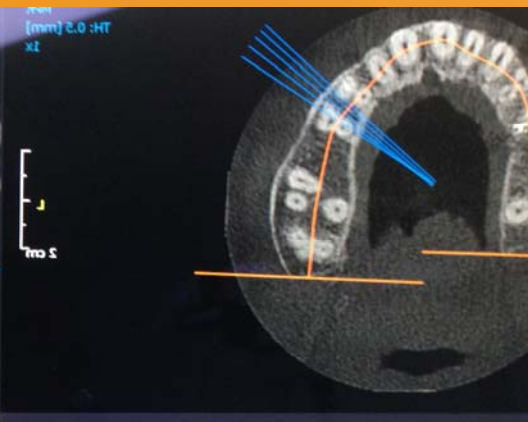

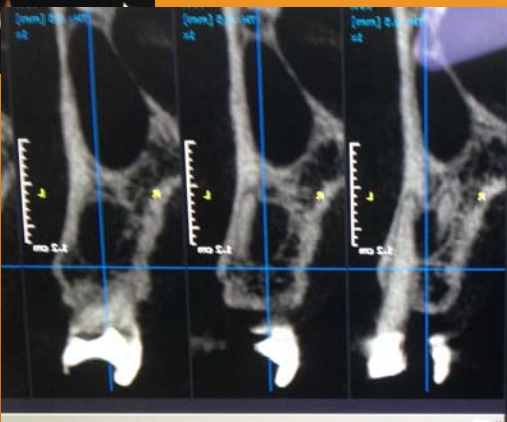

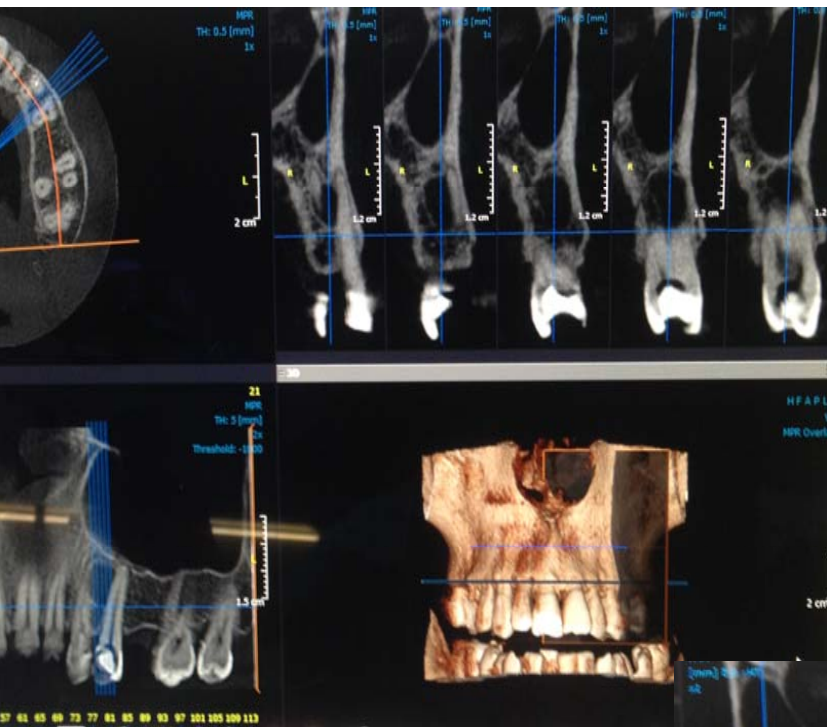

последните дваесет и пет години, со доаѓањето на компјутерите, има револуција како во нашиот живот во домаќина така и во нашата работа како стоматолози.

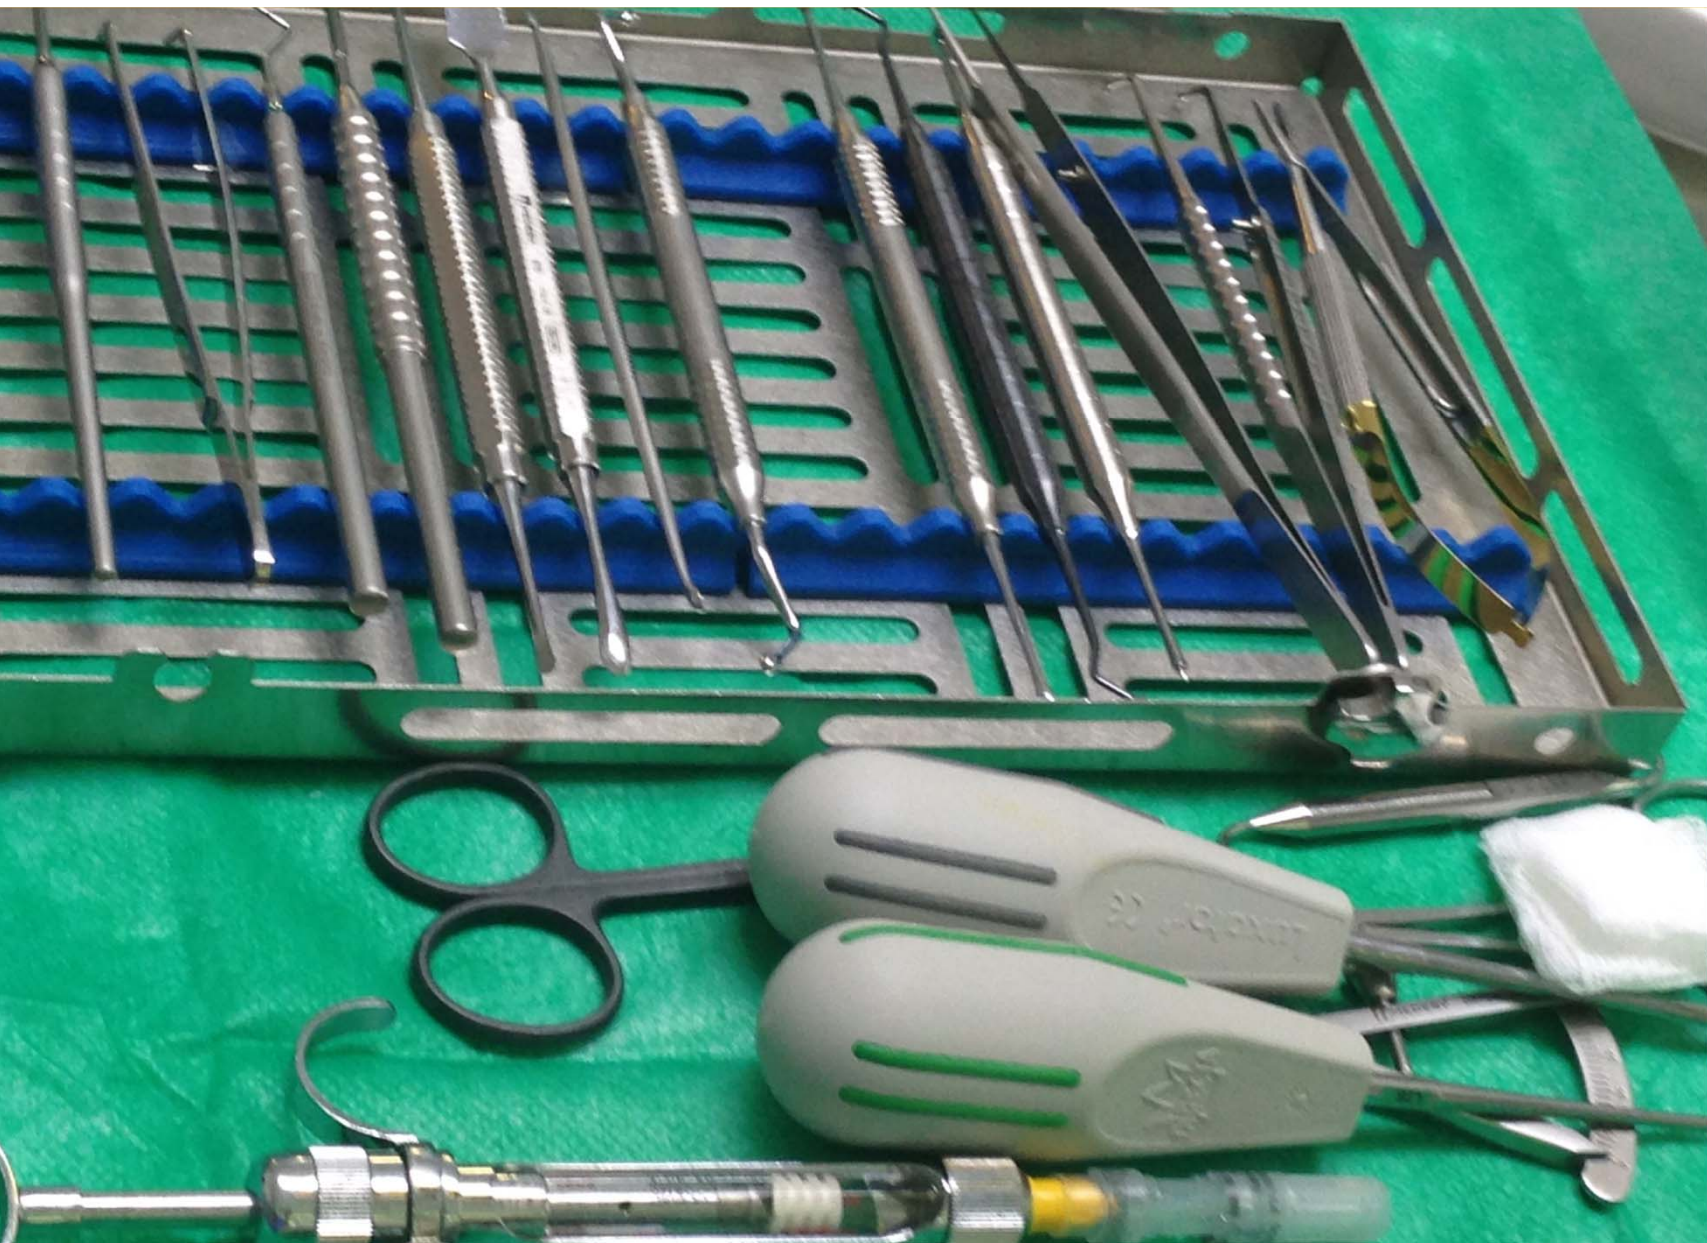

интраоралните скенирања, 3Д планирање на имплантите и ЦД/КАМ изработка на дентални протези, станала секојдневие во стоматолошката пракса.
