#### Contents

1	Major Pollutants of Contaminated Paddy SoilsSunbal Siddique	1
2	<b>Problems and Prospects of Cultivating Indigenous Flood and</b> <b>Brackish Water-Resistant Varieties of Paddy in the Context of</b> <b>Projected Sea Level Rise: A Case Study from Karnataka, India</b> Tamoghna Acharyya and Manoranjan Mishra	19
3	<b>Environmental Pollution of Soil and Anthropogenic Impact of</b> <b>Polymetallic Hydrothermal Extractions: Case Study—Bregalnica</b> <b>River Basin, Republic of Macedonia</b> Biljana Balabanova, Trajče Stafilov, and Robert Šajn	27
4	Sources of Organochlorine Pesticidal Residues in the Paddy Fields Along the Ganga-Brahmaputra River Basin: Implications for Long-Range Atmospheric Transport Paromita Chakraborty, Sanjenbam Nirmala Khuman, Bhupander Kumar, and Daniel Snow	69
5	Antibiotics Pollution in the Paddy Soil Environment	85
6	Antibiotics and Resistant Genes in Paddy Soil	99

7	Paddy Land Pollutants and Their Role in Climate Change Rida Akram, Veysel Turan, Abdul Wahid, Muhammad Ijaz, Muhammad Adnan Shahid, Shoaib Kaleem, Abdul Hafeez, Muhammad Muddassar Maqbool, Hassan Javed Chaudhary, Muhammad Farooq Hussain Munis, Muhammad Mubeen, Naeem Sadiq, Rabbia Murtaza, Dildar Hussain Kazmi, Shaukat Ali, Naeem Khan, Syeda Refat Sultana, Shah Fahad, Asad Amin, and Wajid Nasim	113
8	Impact of Pollutants on Paddy Soil and Crop Quality Iftikhar Ali, Muhammad Jamil Khan, Mumtaz Khan, Farah Deeba, Haziq Hussain, Muhammad Abbas, and Muhammad Daud Khan	125
9	Paddy Soil Microbial Diversity and Enzymatic Activity in Relationto PollutionMuhammad Afzaal, Sidra Mukhtar, Afifa Malik, Rabbia Murtaza,and Masooma Nazar	139
10	Arsenic in Paddy Soils and Potential Health Risk Bushra Afzal, Ishtiaque Hussain, and Abida Farooqi	151
11	<b>Risk Assessment of Heavy Metal Contamination in Paddy Soil,</b> <b>Plants, and Grains (</b> <i>Oryza sativa</i> <b>L.)</b> Prasanti Mishra and Manoranjan Mishra	165
12	Arsenic in Untreated and Treated Manure: Sources, Biotransformation, and Environmental Risk in Application on Soils: A Review	179
13	Fate of Organic and Inorganic Pollutants in Paddy Soils Rida Akram, Veysel Turan, Hafiz Mohkum Hammad, Shakeel Ahmad, Sajjad Hussain, Ahmad Hasnain, Muhammad Muddasar Maqbool, Muhammad Ishaq Asif Rehmani, Atta Rasool, Nasir Masood, Faisal Mahmood, Muhammad Mubeen, Syeda Refat Sultana, Shah Fahad, Khizer Amanet, Mazhar Saleem, Yasir Abbas, Haji Muhammad Akhtar, Sajjad Hussain, Farhat Waseem, Rabbia Murtaza, Asad Amin, Syed Ahsan Zahoor, Muhammad Sami ul Din, and Wajid Nasim	197
14	<b>Tolerance Mechanisms of Rice to Arsenic Stress</b> Shahida Shaheen and Qaisar Mahmood	215
15	<b>Enzymes' Role in Bioremediation of Contaminated Paddy Soil</b> Niharika Chandra, Swati Srivastava, Ankita Srivastava, and Sunil Kumar	229
16	<b>Bioremediation of Contaminated Paddy Soil</b> Naseer Ali Shah, Imdad Kaleem, Asghar Shabbir, Sadaf Moneeba, and Ayesha Hammed Khattak	245

### Chapter 3 Environmental Pollution of Soil and Anthropogenic Impact of Polymetallic Hydrothermal Extractions: Case Study— Bregalnica River Basin, Republic of Macedonia

Biljana Balabanova, Trajče Stafilov, and Robert Šajn

#### 3.1 Introduction

The distribution of certain chemical elements, which in higher contents represent hazard to the environment, causes certain unwanted consequences on human health (Brulle and Pellow 2006; Duruibe et al. 2007). Pollution of the environment with toxic metals has been topic of numerous studies which specify as their main subject matter the industrialized areas, the areas where exploitation and processing of natural resources (oil, ore, etc.) take place or highly populated areas where the traffic and communal waste represent the main sources of metals (Alloway and Ayres 1997; Siegel 2002; Järup 2003).

The exploitation of mineral resources by man leads to excavation, separation, transportation and dispersion of the metals contained in the fine dust (microparticles). In this way the metals are introduced into the environment in much greater contents than normally found in nature (Sengupta 1993; Salomons 1995). With the passage of time and the long-term activities of the human factor, the contents of certain metals have been completely and permanently changed in relation to their natural existence in the environment. These changes can have a significant influence
