# **DENTAL SUMMER SCHOOL & SECOND INTERNATIONAL STUDENT’S CONGRESS IN DENTAL MEDICINE 2019**

Students of the Faculty of Medical Sciences- Dental Medicine at the University “Goce Delcev” in Stip gladly invites you to participate in Dental Summer School and Second International Student’s Congress which will be attended in Hotel „Desaret”-Ohrid during the period from 23.05.2019 until 26.05.2019.

Dental Summer School is a project that we are especially proud of and grateful for the opportunity to upgrade our theoretical knowledge through the lectures and to perfect our skills through practical workshops.

Motivated by the success of the previous Summer School, we hope for another successful organization that will grow into a tradition, and will be a guide and motivation for future generations.

Enjoy!

Hotel “Desaret”, Ohrid , N. Macedonia - 23.05. - 26.05.2019

### Abstract

**Introduction:** The world is changing faster than ever. Fueled by rapid technological advances, one of the most dynamic fields is 3D printing and CAD/CAM technology. Systems are leading in this exciting new 3D printing innovation, for dental technology and dental care industries.

**Aim or purpose:** Our goal is to evaluate the positive and negative sides of using Cad Cam or 3D printing, and to present you how all handmade dentistry products have been replaced with the use of Cad Cam and 3D printing technology.

**Material and methods:** Various contemporary research articles form relevant databases were used to obtain the results, such as PubMed.

**Results:** According to most studies it's discovered that dental industry has been revolutionized by 3D printing technology. 3D printing has eliminated the need to make dental models by hand, and intraoral scanners have removed the need for taking physical imprints entirely.

**Conclusion:** From our research we concluded that, due to the use of 3D printing technology which provides more cost-effective and timely solutions for restorative dentistry, conventional dental labs will become less popular. Need a tooth, why not print one?
