

Dushko Josheski
Tatjana Boshkov
Elena Karamazova

**Three
essays in
economics,
finance
and linear
programing**

Contents

Monetary policy effectiveness, and some explanations of unemployment, fair wages and fair prices in a general equilibrium setting.....	1
Introduction	1
Monetary policy effectiveness.....	3
Equilibrium Unemployment.....	6
One peculiar source of unemployment: social customs and a notion fair wages.....	16
Fair pricing of Eyster, Madarsz, Michaillat,(2019) in Monopoly model and New Keynesian setting	22
RBC and NK DSGE models with labor hours as proxy for labor supply.....	24
Conclusion.....	29
References	29
2.The impact of digital finance and fintech on financial inclusion and the emergence of DFS providers...33	
Introduction	33
DFS providers and the goals of maximizing the welfare of DFS users	34
The need for appropriate regulation - catalysts for the growth of DFS	35
Fintech providers and traditional financial institutions	36
Supervisory capacity for financial inclusion and digital financial services.....	36
How can governments promote digital financial inclusion?	37
Effects of interoperability.....	38
How does Fintech change central banking over the next generation?.....	39
Conclusion	40
References	40
3.Basic Concepts of Linear Programming and application	42
Introduction	42
The diet problem	43
A numerical example	47
Solution by elimination	48
Elements of Game Theory.....	54
Duopoly: an opposition of interests.....	54
Basic definitions and classifications.....	55
Interrelations between Linear Programming and Game Theory.....	56
Conversion of a game into a linear- programming problem.....	57
Bondareva - Shapley Theorem.....	61
The theory of the core of n-Person Game.....	63
