Turkish Journal of Biochemistry (TJB), official journal of Turkish Biochemical Society, is issued electronically every 2 months. Research articles, reviews, short communications, technical reports, case presentations, opinions, and letters to the editor, that have not published elsewhere, on biochemistry, clinical biochemistry, molecular biology, molecular genetics, biotechnology, bioinformatics, bioengineering, and their educational disciplines are published in the journal.

The main aim of the journal is to support the research and publishing culture by ensuring that every published manuscript has an added value and thus providing international acceptance of the "readability" of the manuscripts published in the journal.

BCLF WELCOME LETTER

Dear friends and colleagues,

On behalf of Balkan Clinical Laboratory Federation it is my great pleasure to invite you to take part on this great scientific event to be held on 27-31 October 2019 in Antalya - Turkey.

Gear up for an exciting and informative 27th Balkan Clinical Laboratory Federation Meeting that will enable You to refresh your knowledge base, explore innovations, exchange ideas, meet other researches, friends and colleagues as well as sponsors and exibitors.

The Meeting will cover all the scientific and technological aspects of Laboratory Medicine. Ideal location to participate to very advanced scientific presentations combined with well balanced programme of oral and poster presentations, and dedicated workshops, will guarantee an efficient exchange of ideas and allow productive discussions.

These are exciting times in the world of laboratory medicine and I am sure that 27th BCLF Meeting will be a rewarding and unforgettable experience for all participants.

I look forward to meeting you all in beautiful Turkey.

BCLF President

XXVII. Balkan Clinical Laboratory Federation Meeting BCLF 2019 XXX. National Congress of the Turkish Biochemical Society TBS 2019

TBS WELCOME LETTER

Dear Colleagues, Dear Friends,

On behalf of the Turkish Biochemical Society (TBS), it is a great pleasure to welcome you to Antalya and to the Joint Meeting of 27th Balkan Clinical Laboratory Federation Congress and 30th National Biochemistry Congress of TBS.

Formerly, TBS held a lot of joint international congresses with the collaboration of international organisations and BCLF. This BCLF Congress is the fifth in Turkey. The last one was in Istanbul, embedded within the Worldlab 2014.

In general, the BCLF congresses are held at the beginning of September. But we asked the colleagues from the EB of BCLF if the congress could be held at the end of October. Because we organize national biochemistry congresses every year at the end of October covering 29th October which is the anniversary of the foundation of Turkish Republic. So we celebrate this special day in our congresses every year with a greate gratefulness to Mustafa Kemal, the founder of TR. And, I am pleased that all the BCLF EB members approved our proposal. I would like to thank to all colleagues from the BCLF EB.

The scientific program of the Congress is powerful. As you know, former IFCC President **Prof. Howard Morris** would come to the Congress for the opening lecture. But it is our deep sorrow that he passed away due to a heart attack in April. We commemorate him with our deepest respect.

There are many top keynote speakers in the program such as **Khosrow Adeli (the newly elected president of IFCC, on behalf of IFCC, Canada), Mario Plebani** (opening lecturer, on behalf of IFCC, Italy), **Sverre Sandberg** (EFLM past-president, on behalf of EFLM, Norway), **Elvar Theodorsson (Sweden), Christa Cobbaert (on behalf of IFCC, Netherland), Jerca Dumic** (on behalf of FEBS, Croatia), **Hassan Bayat** (Iran), **Alexander Haliassos** (Greece), and **Tomris Ozben** (IFCC Treasurer and newly elected president of EFLM). Of course, there are a lot of foreign and Turkish outstanding scientists, difficult to name one by one, as a speaker or chair on interesting and hot topics of biochemistry / clinical biochemistry, and laboratory medicine. As total there are more than 50 speakers at the Congress.

In the scientific program, due to the high demand, we could open wide space for oral presentations. There are 116 oral presentations now. And, as usual, there are numerous (more than 200) poster presentations.

Additionally, the courses/workshops performed before or will be held during the Congress are remarkable. Two of them, the **EFLM scientific writing course** and the **miRNA Course** were successfully completed today, just before the opening. I would like to highlight the workshops during the Congress on **basic and advanced mass spec** and **Six Sigma application for analytical performance**. Another important workshop prepared by **National Metrology Institute** of Turkey on the **traceability in laboratory medicine**. Diagnostic companies also support the scientific program by their satellite symposia. Every Congress day, there are one or two industrial satellite symposia with interesting topics.

There is an important session also on 30th of October on Nazmi Ozer Science Award. Two young scientsits who won the awards last year will present their studies in this session. And the new award winners of this year will be announced.

Dear colleagues, geographically and culturally Turkey is a "bridge" between Europe and Asia. Therefore, and I am pleased to say that there is a greater participation to Congress than I expected with a total of >600 attendees. About 130 of them from essentially Balkan countries and other European countries such as Germany, Sweden, Norway and Croatia, but there are participants from Iran, Iraq, Syria, Pakistan, Azerbaijan etc.

The young scientists have revealed a great interest to the Congress. There are too many young scientists actively attending to the Congress with a presentation. As usual, we tried to respond to this interest by giving **registration bursary** to these young persons (We gave registration bursary to more than 60 young colleagues). We also gave young colleagues (<35 years old) an opportunity to free participation in two days EFLM scientific writing course. We are proud to be able to give this support. I hope, active participation in this Congress will prove greatly beneficial to their continuing professional development.

Dear Colleagues, historically or politically, there might be some conflicts between some of these countries in this huge region, but science means peace or science is a means of peace at the same time, I think. So, this meeting will contribute not only to the scientific development in lab med but also contribute to lasting and sustainable peace in this region.

I would like to highlight once again that all abstracts presented at the Congress will be published in the **Turkish Journal of Biochemistry**, the official journal of TBS and listed by SCI-E. This is also valuable for especially young colleagues, I think.

Finally, I would like to thank to all speakers, attendees, our sponsors, and the PCO, Kenes.

Dear Collegues, the Congress venue and accomodation conditions are well, the weather of Antalya is also excellent for this season. I hope all attendees will enjoy the meeting.

I wish you a successful and fruitful Congress.

- julyial

Thank you for coming...

With my best regards,
