**Faculty of Education**

Third International Conference “Education across Borders”  
**Education and Research across Time and Space**  
(1100<sup>th</sup> Death Anniversary of St. Clement of Ohrid)

6-7 October 2016

Bitola

### **Organizing Institutions:**

University "St. Kliment Ohridski" in Bitola (Faculty of Education in Bitola) together with the University „Fan S. Noli“ – Korçë (Faculty of Education and Philology in Korçë), University of Niš (Faculty of Education in Vranje and Center for Byzantine-Slavic Studies in Niš), Plovdiv University "Paisii Hilendarski" (Faculty of Education in Plovdiv) and Adam Mickiewicz University in Poznań (Faculty of Polish and Classical Philology and Institutes for Slavic and Polish Philology in Poznań).

### **Plenary Lectures:**

Dimitar Pandev, Faculty of Philology "Blaže Koneski" in Skopje

*A Word on the Slavic Patterned Teachings*

Grozdana Gojkov, Serbian Academy of Education in Belgrade

*Education and Research in Postmodern World*

### **Conference topics:**

- Ohrid Literary School – The First Slavic University
- Language & Literature
- Pedagogy & Psychology
- Science, Math, ICT
- Social Sciences

### **Program Committee:**

Sašo Korunovski, Rector of the University "St. Kliment Ohridski" - Bitola  
Ali Jashari, Rector of the University „Fan S. Noli“ - Korçë  
Bogumiła Kaniewska, Vice Rector of the Adam Mickiewicz University - Poznań  
Benita Stavre, Vice Rector of the University „Fan S. Noli“ - Korçë  
Valentina Gulevska, Faculty of Education - Bitola  
Sunčica Denić, Faculty of Education - Vranje  
Rumjana Tankova, Faculty of Education - Plovdiv  
Dragiša Bojović, Center for Byzantine-Slavic Studies - Niš  
Bogusław Zieliński, Institute for Slavic Philology - Poznań  
Dobri Petrovski, Faculty of Education - Bitola  
Jove Dimitrija Talevski, Faculty of Education - Bitola  
Donika Dardha, Faculty of Education and Philology - Korçë  
Vasilika Pojani, Faculty of Education and Philology - Korçë  
Slađana Ristić Gorgiev, Center for Byzantine-Slavic Studies - Niš  
Branko Gorgiev, Center for Byzantine-Slavic Studies - Niš  
Krzysztof Trybuś, Institute for Polish Philology - Poznań  
Božidara Kriviradeva, Faculty of Education - Sofia  
Galena Ivanova, Faculty of Education - Plovdiv  
Blagica Zlatković, Faculty of Education - Vranje  
Danijela Zdravković, Faculty of Education – Vranje

### **Organising Committee:**

PhD Biljana Cvetkova Dimov, President of the Organising Committee  
MA Meri Stoilkova-Kavkaleska  
PhD Metodija Stojanovski  
PhD Dobri Petrovski  
PhD Jove Dimitrija Talevski

## DEDICATED TO THE WAY OF TEACHING ENGLISH GRAMMAR

**Sashka Jovanovska**

Faculty of Education - University “St. Kliment Ohridski” – Bitola  
[jovanovskasaska@gmail.com](mailto:jovanovskasaska@gmail.com)

### **Abstract**

Teaching grammar is an essential part of school education or adult learning. Without good grammar, spoken or written words will lose much of their meaning and most of their value. Grammar is a very important thing to get the right meaning and teachers should take extra care to impart proper grammar to all of their students. English grammar is notoriously difficult to learn for both native and second-language speakers. There are so many intricacies, obscure rules and exceptions that different generation of teachers have used various approaches for teaching grammar and train students to express English language correctly. In the past, memorization-based techniques that relied on repetition slowly gave way to more creative methods. Today, we live in a society that prizes grammar and is willing to adapt more effective methods to achieve the best results in teaching grammar. Grammar lessons should not be boring. We, as teachers, should never not allow our classes be boring or not effective. Grammar is central to the part of teaching and learning languages. It is also one of the most difficult aspects of language to teach it as well.

**Keywords:** grammar, teaching, students, education

### **1. Introduction**

Grammar is very helpful for effective language learning and it can be taught through different methods of second language teaching. Although the principles of the methods are different from one another, there is always a focus on grammar, whether explicit or implicit. Further, grammar is thought to bring the basis for a set of language skills: listening, speaking, reading and writing. In listening and speaking, grammar plays a main part expressing spoken language (e.g. expressions) since learning the grammar of a language is considered necessary to acquire the capability of producing grammatically acceptable utterances in the language (Corder, 1988; Widodo, 2004).

In reading, grammar enables learners to comprehend sentence in a paragraph, a passage and a text. In the context of writing, grammar allows the learners to put their ideas into sentences so that they can successfully communicate in a written form. Also, in the case of vocabulary, grammar provides a pathway to learners how some lexical items should be combined into a good sentence so that meaningful and communicative statements or expressions can be formed. In other words, Doff (2000) says that by learning grammar students can express meanings in the form of phrases, clauses and sentences. Long and Richards (1987) add that it cannot be ignored that grammar plays a central role in the four language skills and vocabulary to establish communicative tasks.

My experience as an English language teacher also confirms the view expressed that grammar teaching can actually help learners to learn a second language effectively. From my point of view, if we avoid the traditional perspective of grammar rule teaching and rather teach learners how to use grammar in real life discourse it will be very helpful for them.

### **2. Literature Review**

English Language Teaching shows that grammar teaching can be done either inductively or deductively. The inductive method of teaching grammar involves presenting several examples that illustrate a specific concept and expecting students to notice how the concept works from these examples. No explanation of the concept is given beforehand, and the expectation is that students learn to recognize the rules of grammar in a more natural way during their own reading and writing. Discovering grammar and visualizing how these rules work in a sentence allow students for easier retention of the concept than if the students were given an explanation that was disconnected from examples of the concept. The main goal of the inductive teaching method is the retention of grammar concepts, with teachers using techniques that are known to work cognitively and make an impression on students' contextual memory.

The deductive method of teaching grammar is an approach that focuses on instruction before practice. A teacher gives students an in-depth explanation of a grammatical concept before they encounter the same grammatical concept in their own writing. After the lesson, students are expected to practice what they have just been shown in a mechanical way, through worksheets and exercises. This type of teaching, though common, has many people—including teachers—rethinking such methods, as more post-secondary level students are revealing literacy skills in adulthood. As one former teacher states, deductive teaching methods drive many students away from writing because of the tediousness of rote learning and teacher-centered approaches.

Grammar Translation Method (GTM) is the first method that was used for teaching language. It approaches the language first through detailed analysis of its grammar rules, followed by application of this knowledge to the task of translating sentences and texts into and out of target language. In this method Grammar is taught deductively. It is taught by the presentation and study of grammar rules, which are then practiced through translation exercises. In Grammar Translation Method, a syllabus is followed for the sequencing of grammar points and there is an attempt to teach grammar in an organized and systematic way.

In the method following GTM grammar was, however, taught inductively. In this method, called the Direct Method, direct association is made between the forms and meanings in the target language. Correct pronunciation and grammar both are emphasized here. Grammar structures are taught through examples. New vocabulary and grammar items are taught through demonstration, objects, and pictures.

This set a trend where all the methods following the Direct Method, namely, Audio-lingual Method, which approached grammar teaching inductively. This requires initial attention to meaning rather than to the form of items. In this method analogy is the foundation for language learning. "Analogy is both the cognitive process of transferring information from a particular subject (the analogue or source) to another particular subject (the target), and a linguistic expression corresponding to such a process". A technique in eliciting correct analogy is drilling. Intact the use of drills is a distinctive feature of the audio-lingual method. "The students repeat an utterance aloud as soon as they have heard it. They will do it without looking at a printed text" (Richards and Rodgers, 1986:60). The most important thing about inductive grammar teaching is that explanations of the rules are not given until students have practiced a grammar item in a variety of context and have acquired a perception of the analogies involved. Another technique used in Audio-lingual grammar teaching is memorizing dialogues. This provides the means of contextualizing key structures and illustrate situation in which structures might be used.

However, a major shift occurred in the emphasis of skill from reading and writing to speaking, and a new approach evolved called the Communicative Language Teaching (CLT) approach. This focuses on the notions and functions rather than the grammar structure.

The goal of communicative language approaches is to create a realistic context for language acquisition in the classroom. Some techniques through which CLT methods focus on the communication skill are through group and pair activities, language games, role-plays etc. However, it is the responsibility of the teacher to organize the classroom as a setting for communication and communicative activities. For example, during a group activity "the teacher monitors, encourages, and suppresses the inclination to supply gaps in lexis, grammar, and strategy... At the conclusion of group activities, the teacher leads ...assisting groups in self-correction discussion". (Richards and Rodgers, 1986: 168)

Another method of teaching grammar is to incorporate interactivity into lessons. Using games to teach grammar not only engages students but also helps them to remember what they've learned. This method allows teachers to connect their lessons to the different learning styles of students. For instance, each student can be given a large flashcard with a word on it, and the students must physically arrange themselves into a proper sentence. Other games can include word puzzles or fun online quizzes.

My Experience of Grammar Teaching is in Primary school where I taught English at the elementary level. In my teaching I have tried to avoid the traditional perspective rule-teaching of grammar. I did not give them the meaning and rules at the beginning. I have tried to teach them through text, pictures, physical objects, role-play etc. I have also chosen different techniques for teaching different grammatical aspect. I did not depend on techniques from one particular method. As a result I used an eclectic method of teaching.

### **3. Recommendations**

Because teaching has been focused on effective grammar teaching, these are recommendations for conducting a successful grammar class:

- Avoid rule-giving teaching: In many ESL classes, grammar is taught deductively. The teacher gives some grammar rules and the students memorize those rules. Although this may ensure good grades in exam, when they are asked to apply the grammar items in real life context, they are sure to face great problems. If the teachers avoid the traditional rule-giving of teaching and teach grammar inductively it will make the grammar teaching effective.

- Engage the learner: In ESL classes while teaching grammar, teachers directly go straight into the lesson. It is necessary to prepare the learner for the lesson. Teachers need to engage the students first. They need to give students idea about their lesson by asking them some guiding questions that will lead them into the lesson.

- Teaching through pictures and physical objects: Teachers can give examples in the form of pictures, drawings or objects and then explain the grammar structure through those examples. If teachers show them pictures and physical objects, students can not only listen but also visualize the examples. This visualization will reinforce what they listen and therefore will grammar teaching more meaningful and consequently effective.

- Teaching through texts: It is very important for the students to know the grammar structure and also to apply it in real life context. Teachers can teach grammar through text. It will help the students to use grammar structure in real life context.

- Teaching through role-play: once students know any grammar structure they need to practice it in different situation. Role-play can serve this purpose of practice and revision. If the teacher teaches through role-play, students will able to use the structures in different situations. In other words, by avoiding traditional grammar teaching and incorporating teaching techniques used in the CLT method (which although, focuses on the communication skill rather than grammar structure), grammar teaching can be made more interesting, meaning and effective.

### **Conclusion**

Teaching English as a foreign language in primary school should include all the aspects of the language because none of them is to be neglected. Grammar was for long taught for its own sake, but it is an integral part of any language learning and modern approach to teaching grammar introduces it through concentric circles spreading progressively the learners' knowledge as they proceed from the beginning to more advanced phases. There is no satisfactory communicative competence without having mastered the grammar rules and structures of the target language.

Grammar is can be the most delicate aspect of language as a system also the age factor should determine the most adequate learning strategies to be stimulated and developed through the teaching process. As practice has proved that explicit learning strategies in formal teaching environment have negative correlation with successful acquisition, mechanistic drill exercises that separate the form from the meaning and use, which results is boredom and losing motivation on the side of the learner, should be reduced to the necessary minimum. Different research and project assignments could stimulate the learners to rely on implicit learning strategies, which would definitely help the development of a future autonomous speaker able to use the language correctly and fluently.

Over the years, many methods have been developed for teaching grammar and have been built upon, abandoned, or combined, all with the same goal in teaching students how to communicate effectively and understand how to use the English language. Because of the grammatical complexity of English, each method has its differences. Some lessons are less likely to be remembered, while others may require more in-depth explanation and practice. Regardless of how grammar is taught, a well-rounded understanding of English grammar is the most important factor in improving the literacy of students.
