ACTA MEDICA BALKANICA
INTERNATIONAL JOURNAL OF MEDICAL SCIENCES

The Oath of Hippocrates

As a member of the medical profession:

I solemnly pledge to dedicate my life to the service of humanity;

The health and well-being of my patient will be my first consideration;

I will respect the autonomy and dignity of my patient;

I will maintain the utmost respect for human life;

I will not permit considerations of age, disease or disability, creed, ethnic origin, gender, nationality, political affiliation, race, sexual orientation, social standing, or any other factor to intervene between my duty and my patient;

I will respect the secrets that are confided in me, even after the patient has died;

I will practice my profession with conscience and dignity and in accordance with good medical practice;

I will foster the honor and noble traditions of the medical profession;

I will give to my teachers, colleagues, and students the respect and gratitude that is their due;

I will share my medical knowledge for the benefit of the patient and the advancement of healthcare;

I will attend to my own health, well-being, and abilities in order to provide care of the highest standard;

I will not use my medical knowledge to violate human rights and civil liberties, even under threat;

I make these promises solemnly, freely, and upon my honor.

Foreword

The scientific journal Acta Medica Balkanica-International Journal of Medical Sciences-AMBIJMS is an official publication of the Faculty of Medical Sciences at University of Tetova. It enriches the mosaic of scientific journals that our university publishes bi-annually, which includes scientific articles selected from the fields of medicine, dentistry and pharmaceuticals.

AMBIJMS aims to be an open forum for the exchange of scientific research work and to showcase achievements in all fields of medicine both by Albanian academics and by scholars from the global scientific community. As a significant publication ranked alongside the most serious and trusted journals in the field of medicine, “Acta Medica Balkanica” continues to enjoy high acclaim from readers and academics alike, who consistently praise the quality and relevance of the works published in the journal.

Work published in the journal includes original research articles, clinical practices and scientific reviews from prominent researchers, professors, and specialists, as well as health care professionals in the fields of medicine, dentistry and pharmaceuticals from The Republic of North Macedonia and abroad. By showcasing the latest innovations achieved by local, regional and international academics and professionals, we advocate for high human qualities, dedication to the medical profession, and facilitating the exchange of knowledge and ideas while remaining true to the Hippocratic Oath.

We invite all research workers to join us in enriching and shaping the future of science and medical practice by submitting their work for publication in the next issue of the journal Acta Medica Balkanica - International Journal of Medical Sciences – AMBIJMS.

Thank you for your decision to publish your papers in our journal!

Editor-in-Chief
Prof. Dr. Vullnet Ameti
