Abstract: This research analyzes the state of education in 2017 (with a special emphasis on the quality of teaching and learning). Questions that are raised are: how do the teachers and the students feel about the quality of teaching and learning? Do they have any special difficulties in learning? How do they feel about the quality of teaching and learning by the curriculum of the subject? What are the difficulties in learning? The research is conducted in the period from 2016 to 2017 and has a practical character. The results of the research are intended to be used in the coming years to improve teaching and learning. The research is conducted in the form of a questionnaire survey in order to collect data on the quality of teaching and learning.

The research is presented in a research report in March 2017, in the form of a research report. The research report is intended to be used by the teachers and the students in order to improve the quality of teaching and learning. The research is conducted in the form of a questionnaire survey in order to collect data on the quality of teaching and learning. The results of the research are intended to be used in the coming years to improve teaching and learning.

With the National Strategy for primary education we defined the competencies of the students in the field of primary education. The National Strategy is embedded in the curriculum, the content of the teaching materials and the assessment system, and in the practice, through the work of the teachers and the students. The research is intended to be used in the coming years to improve teaching and learning.

Curricula are developed on the basis of National competency-based standards.

The curriculum language instruction for the first grade offers the following topics: 1. Learning and speaking; 2. Initial reading and writing; 3. Character, expression and content and 4. Media literacy and media culture.

In the future, we will focus on the students' prior knowledge contained in the PMIS "Gost Dabicev" - Bitola and RPN "Gost Dabicev" in the school year 2017/18 will be in the first grade and to give our view on achieving the expected results from the year.

Keywords: language prior knowledge, first graders.
