- The company
- Countries of interest
- Regional aspects
- Global aspects – the future
- Conclusion

Global aspects – the future

- In EU eSubmissions of medicinal products are mandatory for all types of Applications
- Some regional National Agencies have developed customized softwares for electronic submissions, but also documents in NeeS and eCTD format can be used
- It is expected that all countries will develop similar network and management system in the near future

Conclusion

- Regional aspects are moving towards Global aspects - Harmonisation
- In “near” future eCTD format is expected to be mandatory for all submissions
- Benefits: data quality, reusability, faster access, more office space
- Submission of products for obtaining marketing authorization by companies must be planned early in the product life cycle and in accordance with the current country regulation for specific product category
