## **Preface**

The collection of papers before you contains carefully selected papers presented at the 32nd International Scientific-Expert Conference of Agriculture and Food Industry “Local Food Production Systems in the Era of Global Challenges.” The conference was held in Sarajevo on December 1–2, 2022, and gathered many local and international institutions and representatives who have established themselves as leaders in their respective fields. The papers presented have addressed current trending topics and challenges in animal and plant production, food technology and nutrition, agricultural economics, and innovative technologies centered around the common goal of transforming the food value chain. The double-blind review process has been conducted with a minimum of three assignees per paper, ensuring only high-quality papers are submitted and published.
