SCOPE

IJEED primarily publishes papers promoting advancement of education economics at all levels. It fills the gap in our understanding of the links between education and the development of individuals, societies and economies. IJEED is particularly interested in international comparisons and detailed studies of educational institutions and outcomes in developing economies. The latter is what distinguishes the journal from other journals whose focus is education economics more generally. Theoretical and empirical analyses at both micro and macro levels receive equal attention. Topics covered include: -Formal and informal education/training; role of voluntary organisations -Economic education and teaching of economics - Higher education: responsiveness to demands of society -Supply of education; education quality, measurement and issues -Teacher/instructor

training and quality; dealing with bullying at schools -Access to education; education costs; public vs. private financing -Private school/higher education: private entrepreneurship's role -Enrolment/drop-out rates, completion rates, and gender imbalance -Returns to education and labour market outcomes - Apprenticeships, training, skills upgrading; implementation, outcomes - Regional, rural/urban, and ethnic disparities in provision of education - Incentives, education delivery and outcomes -Education, health and happiness -International flows of human capital and brain drain -Any other relevant topic

SJR

2012201420162018202020220.060.120.180.24

The SJR is a size-independent prestige indicator that ranks journals by their 'average prestige per article'. It is based on the idea that 'all citations are not created equal'. SJR is a measure of scientific influence of journals that accounts for both the number of citations received by a journal and the importance or prestige of the journals where such citations come from. It measures the scientific influence of the average article in a journal, it expresses how central to the global scientific discussion an average article of the journal is.

Year	SJR
2012	0.103
2013	0.104
2014	0.114
2015	0.193
2016	0.143

 2011 2013 2015 2017 2019 2021 100.20.40.60.8

This indicator counts the number of citations received by documents from a journal and divides them by the total number of documents published in that journal. The chart shows the evolution of the average number of times documents published in a journal in the past two, three and four years have been cited in the current year. The two years line is equivalent to journal impact factor™ (Thomson Reuters) metric.

Cites per document	Year	Value
Cites / Doc. (4 years)	2011	0.000

Total Cites

Self-Cites

20112013201520172019202102550

Evolution of the total number of citations and journal's self-citations received by a journal's published documents during the three previous years.

Journal Self-citation is defined as the number of citation from a journal citing article to articles published by the same journal.

Cites	Year	Value
Self Cites	2011	0
Self Cites	2012	0
Self Cites	2013	0
Self Cites	2014	1
Self Cites	2015	7

External Cites per Doc

Cites per Doc

20112013201520172019202100.40.8

Evolution of the number of total citation per document and external citation per document (i.e. journal self-citations removed) received by a journal's published documents during the three previous years. External citations are calculated by subtracting the number of self-citations from the total number of citations received by the journal's documents.

Cites	Year	Value
External Cites per document	2011	0
External Cites per document	2012	0.000
External Cites per document	2013	0.167
External Cites per document	2014	0.000
External Cites per document	2015	0.100
External Cites per document	2016	0.048
External Cites per document	2017	0.136

% International Collaboration

20112013201520172019202102040

International Collaboration accounts for the articles that have been produced by researchers from several countries. The chart shows the ratio of a journal's documents signed by researchers from more than one country; that is including more than one country address.

Year	International Collaboration
2011	16.67
2012	0
2013	0
2014	5.00
2015	9.09
2016	5.88
2017	10.53
2018	8.00
2019	25.00
2020	17.39
2021	21.74
2022	34.78

Citable documents

Non-citable documents

20112013201520172019202104080

Not every article in a journal is considered primary research and therefore "citable", this chart shows the ratio of a journal's articles including substantial research (research articles, conference papers and reviews) in three year windows vs. those documents other than research articles, reviews and conference papers.

Documents	Year	Value
Non-citable documents	2011	0
Non-citable documents	2012	0
Non-citable documents	2013	0
Non-citable documents	2014	0
Non-citable documents	2015	0
Non-citable documents	2016	0
