## Fetal therapy

1. 100 open fetal spina bifida repairs at the zurich center for fetal diagnosis and therapy
2. A systematic review of maternal and fetal safety of in utero stem cell transplantation
3. Analysis of the results of fetoscopic laser therapy in twin to twin transfusion syndrome
4. Antenatal immunoprophylaxis after systematic non-invasive fetal RhD determination during first trimester of gestation
5. Cardiac dysfunction and pulmonary hypertension in newborns with congenital diaphragmatic hernia
6. Cell free fetal rhesus D test to rhesus negative women to reduce unnecessary administration of anti-D
7. Changes in fetal Dopplers during fetal myelomeningocele repair through a mini-hysterotomy
8. Chorionic membrane separation following fetal myelomeningocele repair
9. Cord occlusion in complicated monochorionic multiple pregnancies
10. Development of a sealing system for iatrogenic defects of the amniotic membranes after fetal surgery
11. Evaluating bladder function and safety in prenatal fetoscopic versus prenatal open myelomeningocele repairs
12. Evaluation of prenatal motor function in neural tube defects with prenatal or postnatal repair
13. Fetal myelomeningocele repair through mini-hysterotomy
14. Fetal RhD genotyping in RhD negative woman – cost and benefits
15. Fetal tracheoscopy and endoscopic tracheal intubation
16. Fetoscopic therapy for severe pulmonary hypoplasia in congenital diaphragmatic hernia
17. Head circumference shape parameters on a case of open fetal repair of myelomeningocele defect
18. Latin American congenital diaphragmatic hernia study group registry
19. Low-cost simulation-based learning strategy for intrauterine invasive procedures
20. Maternal and fetal complications following fetal myelomeningocele repair
21. Maternal serum FOLR1 in fetal neural tube defect
22. Middle cerebral artery Doppler in hypoxemia induced fetal pulse wave reflection after intrauterine transfusion
23. Multiple exon testing has diagnostic accuracy in the non-invasive testing of RhD status of the fetus
24. Oral prednisolone versus intrauterine transfusion in treatment of isoimmunized pregnant females with Rh-D incompatibility
25. Outcome of congenital diaphragmatic hernia– what we can learn from a single center with multiple prenatal evaluations
26. Prenatal presence of myelomeningocele sac associated with worse neurologic sequelae: evidence for prenatal stretch injury
27. Presentation and obstetric outcomes of prenatally undiagnosed neonatal anaemia
28. Pyelomic stent placement in fetuses with obstructive uropathy
29. Repeated fetoscopic laser coagulation of placental anastomoses in case of recurrence of TTTS
30. Role for therapeutic interventions in euploid fetuses with isolated pleural effusion
31. Saving homozygous alpha thalassaemia-1 fetuses with intra-uterine transfusion
32. SOX3 duplication: a genetic cause to investigate in fetuses with neural tube defects
33. The clinical significance of assessing fetal genotype in alloimmunized women
34. Tissue glue embolization of giant chorioangioma: Clinical course and perinatal outcome
35. To show the outcome of a pregnancy in a patient with Rh incompatibility in pregnancy
36. Twin reversed arterial perfusion: first-trimester intervention
37. Twin-to-twin transfusion syndrome in uterus bicornis unicornis after previously uncomplicated twin pregnancy in separate horns
38. Use of self-expanding mesh for thoracoscopic repair of the congenital diaphragmatic hernia in neonates
