

## **Exchanges**

LOJA's exchange program focuses on intercultural and creative exchange between young people with different ethnic, cultural, social, and language backgrounds in the frames of global peace education.

Therefore groups of young people from all over Europe gather in different locations of the partner countries to be an active part in overcoming boundaries, prejudices, and stereotypes and to create friendships across borders.

Partners in organizing these exchanges are Erasmus+ and OFAJ.

### **Study Visit**

Additionally we offer student & academic exchanges for engaged participants from our training programs.

Our yearly study exchange for students of education and participants of our trainings went to Vienna this year. The students are invited to learn from other education systems, visit schools, hear about human rights projects and civil action initiatives.

### **Academic Exchange**

For our partnering professors of the universities we are cooperating with (UT, UKIM, UGD and UKLO) joined our Academic Exchange, also in Vienna. The Exchange served as an opportunity to work further on the idea to expand the multicultural education program to other countries in the region as well as meeting with institutions, universities and training centers for peace and education.

If you want to join next year's Study exchange make sure to look out for the 'Civic Activism Trainings'.

We will keep you updated on new trainings on our [Facebook](#) and [Web Page](#).
