FUTURE IN FASHION IS CIRCULAR

Let's put an end to textile waste

- From Linear to Circular Model - A Concept for Keeping Materials in Use.
- Modern “Fast fashion” is based on the principle: *buy, use, throw away*.
- Waste as a Resource. Redirecting Consumer Thinking.
- Do we want to be remembered as the people who lived in the era of waste and did nothing to change it?
- The fact is undeniable - **we need a restart!**
- **Keep materials in use, practical examples.**
- **Education about the textile waste is very important!**

FUTURE IN FASHION IS CIRCULAR

Let's put an end to textile waste

- Students – Study Program “**Design and Technology of Textiles and Clothing**” (First Cycle of Studies) and “**Design and Technology of Fashion Clothing**” (Second Cycle of Studies)
- Involvement of Students in Projects - at least 2 projects per year.
- Gaining Practical Skills, Self-Presentation Skills, Internship and Employment Opportunities
- **Textile waste can be reused!** It can be utilized and returned to the economy. It can also generate profit.
- We focus exactly on the potentials of the textile waste on the local level, where the largest amount of textile waste is generated, in Štip.
