The Future of Scientific Publishing

What can we expect in the future?

- Automation and AI tools to accelerate peer review and paper analysis.
- Further growth of the OA model, along with the development of new business models that combine institutional funding.
- More transparent peer review processes (open reviews).
- Greater focus on open data and research reproducibility.

The role of publishers will change – the focus will be on supporting researchers, innovation, and ethics.

Open Access

BUDAPEST OPEN ACCESS INITIATIVE

The original Declaration and guidelines to make research free and available to anyone with internet access and promote advances in the sciences, medicine, and health.

READ & SIGN

LEARN MORE

- December 2001, focused on removing access barriers
- Credited with formalizing 'Open Access' as a term
- Followed by the Bethesda and Berlin statements on Open Access (BBB Statements) which clarified the licensing that should be used providing perpetual access and use rights (CC-BY).

'there's no legitimate scholarly purpose in suppressing attribution to the texts we use.' (Suber, 2019, 4)

Day 2 – Peer Review Process in Scholarly Publishing

18:00–18:05 | Introduction

18:05–18:35 | How to Review a Manuscript (roles, responsibilities, writing review reports)

18:35–19:05 | How to Respond to Reviewer Comments (author perspective)

19:05–19:25 | Ethics in Publishing & Research Integrity

19:25–19:45 | AI in Scholarly Publishing (opportunities and challenges)

19:45–20:00 | Q&A Session

Peer Review Types

OPEN REVIEW

The authors and reviewers know each other's identity.

SINGLE BLIND

The authors do not know the identity of the reviewers.

DOUBLE BLIND

The authors and reviewers do not know each other's identity.

TRIPLE BLIND

The authors, reviewers, and editorial team do not know the identity of the parties involved in the process.
